THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PLOOF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (i BU) is	required to turn at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	ILL RELEVANT PERSONNEL WHO HAVE B OPMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with agislative requirements to first identify any site hazards, conditions unical those hazards and then to further take steps to either the conditions of the conditions are conditionally as a condition of the con	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must strandardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Select me appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips, trips and falls; Unsecured load	2M	 Conduct a thorough pre-start risk assessment of the area to identify and address potential hazards. Clearly mark designated walkways and work as as to prevent slips, trips, and falls. Keep the worksite clean and organised, so by disposing of any waste material or debris that could potentially cause an accide. Require all workers to wear appropriate Person Protective Echipment (PPE) like safety boots with slip-resistate toles, gloves, and wh-visibility sests. Implement a Job Safety Analy (JSA) and Safe Voluntethod Statement (SWMS), detailing to the eduction and processes for bogged vehicle recovery tasks. Regularly into act tools are equipment for vehicle recovery, including the condition of case in room, and shackles ensuring they are in good working order and flow or delivery and shackles ensuring they are in good working order and flow or delivery and shackles ensuring they are in good working order and flow or delivery and shackles ensuring they are in good working order and flow or delivery and shackles ensuring they are in good working order and flow or delivery and shackles ensuring they are in good working order and flow or delivery and shackles ensuring they are in good working order and flow or delivery and shackles ensuring they are in good working order and flow or delivery and shackles ensuring they are in good working order and flow or delivery or delivery and shackles ensuring they are in good working order and flow or delivery or deliver	1L	
2. Site Assessment	Uneven terrain, Wildlife hazard	2M	 Conduct a thorough site inspection before commencing the bogged vehicle recovery process to identify any uneven terrain and potential wildlife hazards. Ensure all personnel involved in the recovery are informed about the identified hazards during pre-start meetings or toolbox talks, and are trained to follow established safety procedures. Implement suitable signage in the vicinity of the job site to notify others of the ongoing recovery efforts and potential hazards present. Utilise appropriate Personal Protective Equipment (PPE), such as sturdy work boots, gloves, high-visibility clothing, and hearing protection (if required) depending on the specific hazards identified. Use hazard cones or delineators to mark the uneven terrain areas and restrict access to authorised personnel only. 	1L	

5

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Avoid working alone - have at least one additional team member available onsite to assist with the recovery, monitor the scene for emerging hazards, and communicate any necessary changes in the operation.		
			- Establish and maintain an effective community on system between all team members present during the bogged vehicle scovery. This could be achieved through two-way radios or hand signals.		
			- Incorporate wildlife management and protect asures, such as engaging qualified handlers or rangers when dealing with somous or as sessive animals on site.		
			- Secure the surrous treation event unsuspection systanders, vehicles, or wildlife from entry of the position of the recovery is in progress.		
			- Consider up ortaking receivery openions unit daylight hours whenever possible to improve visit by and receive easily idea any present hazards.		
			- Reg a maint and inspect recovery equipment, such as winches, jacks, and shack signs damage or wear prior to use.		
			- Plan r over strates considering any forecasted weather conditions, ensuring that extreme we there wents, such as heavy rain or strong winds, do not exacerbate pent in zards create new ones.		
			Proper Endipment Selection: Ensure the selection of appropriate and compatible it every equipment for the vehicle type, size, and weight to prevent the use of inal equate or ill-suited gear.		
			- Familiarisation with Equipment: Provide training sessions on the correct usage of the chosen equipment to enhance workers' understanding, ensuring safer operations during the bogged vehicle recovery process.		
			- Load Rating Check: Confirm that all equipment has a suitable load rating for the specific vehicle recovery task and never exceed its load-bearing capacity.		
2 Equipment Selection	Inappropriate equipment, Manual	2M	- Visual Inspection: Always perform thorough visual inspections of equipment before use to identify any signs of wear, damage, or defect that may compromise safety.	1L	
3. Equipment Selection	3. Equipment Selection handling	ZIVI	- Regular Maintenance: Implement periodic maintenance checks and servicing schedules for all recovery equipment to maintain optimal performance and safety standards.	IL .	
			- Manual Handling Techniques: Provide training on safe manual handling practices to minimise the risk of injury associated with lifting, carrying, and moving heavy equipment.		
			- Use Mechanical Aids: Encourage the use of mechanical aids, such as trolleys and dollies, to transport heavy equipment more safely and efficiently where possible.		
			- Two-Person Operation: Assign certain tasks to be executed by two workers to lessen the individual physical strain and ensure effective communication while handling equipment.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.								
ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS					
The company details have been entered, including the project name and address.								
Names and signatures of all relevant personnel consulted during the development of the SWMS.		D						
Name, signature, position and date signed of the person approving the SWMS.								
Specific personnel and qualifications, experience is noted in the SWMS.	P							
Provides a step-by-step process of tasks required to carry out the activity or task.								
Adequate risk assessment of any identified hazards has been completed.								
Foreseeable hazards are identified and documented for each step.								
Any hazards listed in any site risk assessments have been added to the SWI								
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.								
Check control measures added to the SWMS are the most effecting secutions.								
Responsible person is assigned and listed on the SWMS for the imperent of contameasures.								
Permit requirements specified, such as Hot Work, Verat Heights etc.								
SWMS identifies plant and equipment to be u d.								
Details of inspection checks required for any equipment listed at noted on the SWMS.								
Describes any mandatory qualifications, experience reining skills required to perform the work.								
Applicable personal protective equipment is selected on the SWMS.								
Lists any required permits or licenses.								
Reflects and documents any legislative references and/or Australian Standards.								
Identifies any hazardous substances used with specific control measures in line with any SDS.
