

Bread Slicer Sa	AFE WORK METHOD STAT	EMENT (SWMS)								
TASK OR ACTIVITY: Bread Slicer										
Business Name: [Company Name]		ABN: [ABN]	SWMS#							
Business Address: [Company Address]										
Contact Person:	Phone: [Phone]	E fil:								
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY 1	THE PL OF THE PROJECT								
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	eting a business or undertaking (F RU) is	required to ure at a safe work method s	tatement (SWMS) is prepared before							
Full Name:										
Signature:		Title:	Date:							
Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, well as reviews and modifications of the SWMS.										
Full Name:		Title:	Phone:							
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE BI PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND							
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditions those hazards and then to further take steps to either the conditions of the conditions are or conditional talks.	NAME	SIGNATURE	DATE							
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.										
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.										
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips, trips & falls; Manual handling injuries	2M	 Ensure the workplace is clean and free from obstacles to minimise the risk of slips, trips, and falls. Clearly mark any wet or slippery surfaces with sprage to alert workers of potential hazards. Provide adequate lighting in the area surrowaling the read slicer to prevent accidents caused by poor visibility. Require all workers to weat a oper footwear with a ip-resist a soles to reduce the risk of slipping. Implement a regard one and sold the maintain floors and other work surfaces dry and free of poris. Position the conditional slicer of a stable, are afface to avoid unnecessary movement during eration. Organs a paterial and equipment in designated storage areas to keep them off the flother accing the pazards. Utilise nti-facture manual the standing work area around the slicer to enhance and fort and san of or workers. Alloute the sks that require manual handling of bread slicers among multiple porkers an inimise the chance of injuries. In a safe manual handling techniques, such as lifting with their legs and avoiding twisting motions when handling heavy objects. Encourage staff to use lifting aids (e.g., trolleys, dollies, or carts) whenever possible to assist with heavy loads and reduce the likelihood of injury. Schedule frequent breaks for workers throughout their shifts, allowing them to rest and recover from manual handling activities. Set up an ergonomic work environment by adjusting the height of the bread slicer workstation, ensuring that employees can comfortably use the machine without excessive bending or reaching. Establish a regular maintenance schedule for the bread slicer, addressing any potential mechanical issues that could contribute to unsafe conditions promptly. 	1L	
2. Machine Inspection	Electrical hazards; Entanglement	ЗН	 Regular inspection and maintenance: Schedule periodic inspections of the bread slicer, ensuring that all parts are functioning correctly and securely. Isolation of power sources: Before any inspection or maintenance work, isolate all power sources to eliminate electrical hazard risks. Use of lockout/tag-out system: Implement a lockout/tag-out system while working on the machine to prevent unauthorised access or accidental re-energising of the equipment. 	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			 - Wear appropriate personal protective equipment (PPE): Workers should wear proper PPE like gloves, safety boots, and aprons to protect themselves from the risk of injuries during the machine inspection. - Training in machine operation and maintenant. Ensure employees receive adequate training in operating and maintain by the bread slicer, enabling them to recognise potential hazards and take appropriate action. - Familiarity with emergency shut-off procedures so they can recickly react if the issue occurs during an inspection or maintenance activity. - Keep machine guares of device a place: Always characteristics issue occurs during an inspection or maintenance activity. - Keep machine guares of device a place: Always characteristic in inspection or maintenance ask. - Proper hands of electroal compone a Avoid direct contact with electrical confirmance and locate practices when dealing with electrical components, such as us an audiated ask and wearing electrically resistant gloves. - Illumitate porkspant Make sure the inspection and maintenance workspace has sufficient light at the prinimise accidents resulting from impaired visibility. - Experimental process of the prinimise accidents resulting from impaired visibility. - Experimental process of the prinimise accidents resulting from impaired visibility. - Experimental process of the prinimise accidents resulting from impaired visibility. - Experimental process of the prinimise accidents resulting from impaired visibility. - Experimental process of the prinimise accidents resulting from impaired visibility. - Experimental process of the prinimise accidents resulting from impaired visibility. - Experimental process of the prinimise accidents resulting from impaired visibility. - Clear communication among team members: Ensure all workers involved in the inspection process communicate effectively and understand their roles and res		
3. Setup & Adjustments	Crushing injuries, Noise exposure	2M	- Proper Training: Ensure that all employees operating the bread slicer have undergone comprehensive training on its safe operation and adjustments, including hazard identification, machine controls, and potential risks. - Use of Personal Protective Equipment (PPE): Employees should be required to wear appropriate PPE during the setup and adjustment process, including safety gloves to prevent crushing injuries and noise-cancelling earmuffs or earplugs to reduce the risk of hearing damage from prolonged exposure to noise. - Pre-start Inspection: Perform a thorough pre-use inspection of the bread slicer before each shift to ensure that it is in proper working condition and that all safety guards are in place.	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Clear Workspace: Maintain a clean and clutter-free workspace around the bread slicer to minimise the risk of tripping or falling while making adjustments to the machine.		
			- Implement Lockout/Tagout Procedures: During Letup and adjustments, use lockout/tagout procedures to disable the brandslicer and prevent accidental startup or movement of the machine.		
			- Use Proper Tools: Only use manufacturer-ap tools for making adjustments to the bread slicer to reduce the risk of injury due improper to susage or machine damage.		
			- Two-Person Operation ssign, least two trained a proyees to work together when setting up a adjust a the bad slicer to rovide extra support, communication and assist the dun, the process.		
			- Proport Lifting archnique. Train emples in proper lifting techniques to avoid strain and other upgroup skeletal injuries while handling the bread slicer completed during adjustments.		
			- Noise con I Meas as: Reduce noise levels where possible by using soundproof enclosues, in alling the barriers or curtains, and ensuring that the bread slicer ruipment is presently maintained to minimise excessive noise production.		
			- Restart aintenance and Inspection: Plan and schedule regular maintenance hecks. The bread slicer to ensure that all parts are operating correctly and safely, specially those related to the setup and adjustment process. This should include rouse inspections of guards, fasteners, and other machine components to identify signs of wear or damage that may lead to increased noise levels or a crushing nazard.

SAF WC A STHED STATEMENT MONITORING AND REVIEW								
The SWMS must be reviewed regularly to take sure it remains effective and must be reviewed (and revised if necessary) if relevant control measure are subcontracted by the operation of the SWMS and their health and safety representatives who redesented that work group at the workplace. When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist			The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to: 1. Spot Checks. 2. Consultation with workers, contractors and sub-contractors. 3. Internal audits on a continual basis. An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures					
them to understand and imp					tently developing ever-imp	3 ,	· '

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting so tions.			
Responsible person is assigned and listed on the SWMS for the imperent of continue assures.			
Permit requirements specified, such as Hot Work, Veralt Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed are noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
dentifies any hazardous substances used with specific control measures in line with any SDS.
