

Compactor (Vibrating P	late) SAFE WORK METHO	DD STATEMENT (SWMS)						
TASK O	R ACTIVITY: Compactor (Vibration	ng Plate)						
Business Name: [Company Name]		ABN: [ABN]	SWMS#					
Business Address: [Company Address]								
Contact Person:	Phone: [Phone]	E 111:						
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE POST THE PROJECT						
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (N 3U) is	required to ture at a safe work method s	tatement (SWMS) is prepared before					
Full Name:								
Signature:		Title:	Date:					
Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS well as reviews and modifications of the SWMS.								
Full Name:		Title:	Phone:					
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE B PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND					
Safety meetings or toolbox talks will be sched ed in accordance with agislative requirements to first identify any site hazards, conditions unical those hazards and then to further take steps to either the conditions of the cond	NAME	SIGNATURE	DATE					
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.								
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.								
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Trip hazards, manual handling injuries	2M	 Ensure proper housekeeping and remove any obstructions to reduce trip hazards around the working area. Allocate sufficient space for maneuvering the creating plate compactor while in operation, reducing the chances of tripping our obstacles. Clearly mark potential trip hazards or uneventurfact with highly visible warning signs, cones, or barricades. Train employees on safe profices for handling or ipment of carrying out the task, emphasising proper lifting achniques and bod operations. Encourage emploses as each by systems when living heavy objects or moving the compactors reduce the lisk or annual handling injuries. Provide adea the person protective as ment (PPE) like steel-toed boots, glove and high listibity ests to protee employees from injury due to mishandled equip as or of the cards. Inspecies of other cards. Inspecies of other cards. Inspecies of other cards. Issue the hanic mids, such as trolleys or lift-assist devices, whenever possible to me when yobjecs and minimise manual handling risks. Plan are regalise the work in advance, identifying suitable resting points for larger appactors when needed to reduce physical strain. Implement regular breaks and rest periods for workers to prevent fatigue and muscle strains, especially during repetitive or strenuous tasks. Conduct ongoing monitoring and supervision to ensure that control measures are being followed and maintained, reviewing and adjusting protocols as necessary to ensure maximum safety. 	1L	
2. Equipment Inspection	Faulty equipment, electrical hazards	зн	 Conduct a thorough visual inspection of the compactor (vibrating plate) before use to identify any obvious defects or damages such as cracks, damaged plates, loose bolts or connectors. Ensure that equipment operators have completed appropriate training for the safe use, inspection and maintenance of vibrating plate compactors, including relevant qualifications or licenses if required. Verify that the compactor's electrical components, such as power cords, switches, and outlets, are intact and free from damage or wear, which could cause electrical hazards. Follow the manufacturer's recommendations for daily inspection and maintenance, with records kept for compliance purposes. Confirm that safety guards, labels, warnings, and other protective devices on the compactor are present and functional, providing necessary information and protection for users. 	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			 Make sure that all moving parts, such as belts and pulleys, are properly tensioned, aligned, and free from damage or debris build-up that may impair their function or create a hazard. Test the compactor's emergency stop mechanism to ensure it is functioning correctly, with particular attention given to conselectrical connections in the circuit. Verify that the compactor's vibration setting and consus are calibrated and functioning as intended, minimising risk of excent vibration-related injuries. Ensure that appropriate personal protective equation (PPhasip provided and worn by workers when operating or a pecting the vibration plan compactor, such as gloves, safety footward marring attention, and gogg for glasses. Establish a procedure for aporting and documenting any faults, hazards, or issues identified due the inspect of process and aplement an escalation plan for ensuring timely spairs or uplacement. Importent a regular maintenance schedule for the vibrating plate compactor, with inspect on a ponducent by authorised personnel at the recommended intervals specific by a many cturer. Keep the area curroursing the compactor clean, dry and free of clutter, to minimise the or slip hazar. Isolational clearly tag any faulty or unsafe equipment, immediately removing it and service for repair or replacement to prevent its use until it has been a propriately addressed. 		
3. Site Setup	Uneven ground, public exposure to work area	2M	 Conduct a thorough site inspection to identify any uneven ground or potential tripping hazards before setting up the work area. Address any issues by leveling the ground, filling depressions, or removing obstacles where practical. Establish clearly defined work zones with appropriate barriers and signage to restrict unauthorised access and warn the public of potential hazards. Consider using temporary fencing or highly visible tape to separate the work area from public spaces. Develop an effective pedestrian management plan, including designated walkways and safe crossing points to minimise interactions between workers, equipment, and the public. Implement clear communication protocols for workers and site supervisors to ensure workplace health and safety procedures are followed and any hazards are quickly identified and addressed. Provide ongoing training to all workers on proper operating techniques for the vibrating plate compactor, including how to work safely on uneven terrain and the importance of maintaining situational awareness while operating machinery. Regularly inspect and maintain the vibrating plate compactor according to the manufacturer's recommendations, ensuring it is in optimal working condition to reduce the risk of accidents or malfunctions during operation. 	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
		RISA	Require workers to wear personal protective equipment (PPE), including high-visibility clothing, sturdy footwear with non-slip soles, and necessary hearing protection to mitigate risks associated with working a found the vibrating plate compactor. Utilise spotters or other trained personnels censure clear visual communication between machine operators and other work. helpings avoid accidents and increase situational awareness on site. Implement a strict "no-go" zone around the vibrang plate compactor when it is in use, ensuring pedestrians are other workers main in a safe instance from the machinery to prevent injury from living debris or account contact. Establish a regular scheme of for a usekeeping and site cleanup to minimise trip hazards, present clutter are not the schinery and promote a well-organised work environment and supports are practic. Prema an environment are response plan, including designated first-aid personnel and easy to a sto mental equipment, to ensure prompt and appropriate management of any on lace incontacts that may arise. Regular y recommendations are structured to effectiveness of these control measures, logaging worke needback and updating procedures as necessary to further mitigate.	RION

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Tollow any sale work instructions which are provided, and agrees to use all reisonal riotective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting so tions.			
Responsible person is assigned and listed on the SWMS for the imperent of continue assures.			
Permit requirements specified, such as Hot Work, Veralt Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed are noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
dentifies any hazardous substances used with specific control measures in line with any SDS.
