Phone: [Phone]

Email:

THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:

Signature:

Title:

Date:

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, as well as reviews and modifications of the SWMS.

Full Name:

Title:

Phone:

ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED

NAME AND DATED SIGNATURE OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS

Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then to communicate those hazards and then to further take steps to either eliminate or control each hazard.

If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.

Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.

The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

RISK MATRIX									
LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS	
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			Elimination Remove the hazard.	
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	Substitution Replace the hazard.	
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	Isolation Isolate People from the hazard	
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	Engineering Isolate the hazard.	
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records	Administrative Change the work.	
Notes on Hierarchy of Controls: Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.									

PERSONAL PROTECTIVE EQUIPMENT (PPE)											
FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EYE PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED
											
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS; and,
- workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips, trips and falls, Incorrect lifting technique	2M	<ul style="list-style-type: none"> - Ensure adequate housekeeping practices are maintained throughout the work area, by regularly cleaning and clearing any waste materials or obstructions that pose a risk for slips, trips, and falls. - Keep all walkways, working spaces, and access areas free from obstacles, cords, and cables to prevent tripping hazards. - Provide appropriate signage to indicate potential slip, trip, or fall hazards within the work area and ensure all workers are aware of these areas. - Ensure that employees wear closed-toe, slip-resistant footwear with proper support and grip to minimise the risk of slips, trips, or falls. - Train employees in proper lifting techniques to avoid injury while handling heavy equipment or materials. This includes bending at the knees, keeping the back straight and lifting with the legs instead of the back. - Encourage regular breaks and stretching exercises for workers engaged in repetitive tasks or heavy lifting throughout the day to reduce the risk of injury due to fatigue or overexertion. - Use appropriate lifting aids or equipment, such as trolleys, hand trucks, and hoists, when moving heavy items to prevent injuries related to incorrect lifting techniques. - Ensure the Drill Pedestal is secured properly and is located on a flat, stable surface to prevent accidental tipping, wobbling or falling over during use. - Conduct a thorough risk assessment prior to commencing work to identify potential hazards associated with the task, and implement applicable control measures to manage these risks effectively. - Provide ongoing supervision and training to employees on maintaining situational awareness and practicing safe work procedures in the workplace, reinforcing the importance of vigilance in preventing slips, trips, and falls, as well as adhering to correct lifting techniques. 	1L	
2. Inspection	Electric shock, Insecure work area	3H	<ul style="list-style-type: none"> - Ensure proper inspection of electrical cords, plugs, and equipment for any visible signs of wear, damage, or fraying prior to use. Replace or repair damaged components as needed before using the drill pedestal. - Verify that the electrical supply and voltage are compatible with the drill pedestal to prevent overloading, overheating, or short-circuiting. - Implement a regular schedule for the maintenance and testing of electrical equipment, including the drill pedestal, to ensure continued safety and optimal performance. - Install Ground Fault Circuit Interrupters (GFCIs) on all electrical outlets in the work area to reduce the risk of electric shock caused by ground faults. - Make certain that workers operating the drill pedestal are properly trained in its use and are aware of the potential hazards associated with the equipment. 	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> - Set up sturdy barriers around the perimeter of the work area to prevent unauthorised access and ensure that only trained personnel operate the drill pedestal. - Utilise non-conductive mats, gloves, or other personal protective equipment to help minimise the danger of electric shock while working with the drill pedestal. - Routinely inspect and clean the work area, including removing debris, clutter, and loose objects that may pose a slip, trip, or fall hazard near the drill pedestal. - Securely anchor the drill pedestal to a solid surface to prevent it from moving or tipping during operation, following the manufacturer's guidelines for installation and stabilization. - Keep the drill pedestal work area well-lit, ensuring clear visibility for operators at all times to aid in identifying potential hazards and avoid accidents. - Ensure that adequate ventilation is available in the workspace to prevent the buildup of dust, fumes, or vapors, which could lead to an unhealthy or unsafe environment. - Encourage open communication among team members regarding safety concerns and hazard identification within the work area, promoting a proactive approach to Workplace Health and Safety management. 		
3. Setup	Wrong equipment selection, pinch points	3H	<ul style="list-style-type: none"> - Proper Training: Ensure that all operators have received appropriate training in the use of the specific Drill Pedestal and its setup. - Equipment Selection: Operators must be advised to choose the correct drill pedestal for the job, considering factors such as size, weight, and application requirements. - Pre-Start Inspection: Conduct a thorough pre-start inspection to identify any potential equipment faults or irregularities that could lead to issues during setup or operation. - Guarding: Confirm that all necessary guards and safety devices are in place and functioning correctly, including those that protect from pinch points. - Appropriate Personal Protective Equipment (PPE): Ensure that workers wear suitable PPE for the tasks being performed, such as safety footwear, gloves, eye protection, and hearing protection. - Safe Work Methods: Establish clear, safe work methods for setting up the drill pedestal, and ensure that these are communicated to all operators. - Clear Workspace: Keep the area around the drill pedestal clean and free of potential tripping hazards or obstructions. - Correct Mounting: Ensure the drill pedestal is securely mounted to a stable surface before beginning any setup procedures. 	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> - Tool Handling: Instruct operators on the proper handling of tools, such as maintaining secure grips and using ergonomic body positioning to minimise risk of injury. - Secure Components: Double-check that all components, such as the drill bit and chuck, are securely fastened and properly locked to prevent unexpected movement or dislodgment during operation. - Emergency Stop Access: Verify that the emergency stop button is easily accessible and visible to the operator at all times during setup and operation. - Supervision and Monitoring: Supervisors should be present during the setup process to provide guidance, support, and prompt intervention if necessary. - Periodic Review and Updates: Continually review and update the SWMS based on ongoing experience, feedback, and changes in equipment or procedures, ensuring that all control measures remain relevant and effective.

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are needed. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.	<input type="checkbox"/>	<input type="checkbox"/>	
Names and signatures of all relevant personnel consulted during the development of the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Specific personnel and qualifications, experience is noted in the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Provides a step-by-step process of tasks required to carry out the activity or task.	<input type="checkbox"/>	<input type="checkbox"/>	
Adequate risk assessment of any identified hazards has been completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Foreseeable hazards are identified and documented for each step.	<input type="checkbox"/>	<input type="checkbox"/>	
Any hazards listed in any site risk assessments have been added to the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Check control measures added to the SWMS are the most effective solutions.	<input type="checkbox"/>	<input type="checkbox"/>	
Responsible person is assigned and listed on the SWMS for the implementation of control measures.	<input type="checkbox"/>	<input type="checkbox"/>	
Permit requirements specified, such as Hot Work, Electrical Work, Work at Heights etc.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS identifies plant and equipment to be used.	<input type="checkbox"/>	<input type="checkbox"/>	
Details of inspection checks required for any equipment listed are noted on the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Describes any mandatory qualifications, experience, training, skills required to perform the work.	<input type="checkbox"/>	<input type="checkbox"/>	
Applicable personal protective equipment is selected on the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Lists any required permits or licenses.	<input type="checkbox"/>	<input type="checkbox"/>	
Reflects and documents any legislative references and/or Australian Standards.	<input type="checkbox"/>	<input type="checkbox"/>	
Identifies any hazardous substances used with specific control measures in line with any SDS.	<input type="checkbox"/>	<input type="checkbox"/>
