THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PLOOF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	eting a business or undertaking (N 3U) is	required to ture at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	ompliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE BI PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, concluded in accordance with egislative requirements to first identify any site hazards, conclude or conclude those hazards and then to further take steps to either the conclusion of the co	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Select me appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips and falls, Chemical exposure	2M	<ul> <li>Training and induction: Ensure that all workers involved in handling fertilisers are provided with adequate training and induction about the potential hazards and safe work procedures.</li> <li>Personal Protective Equipment (PPE): Property appropriate PPE, such as gloves, safety goggles, and chemical-resistant clother for work to handling fertilisers to minimise chemical exposure.</li> <li>Non-slip footwear: Require workers to wear study non-slip for wear to reduce the risk of slips and falls around in viliser storage and in utilizer workers to reduce the risk of slips and falls around in viliser storage and in utilizer work way from walkways or high-traffic zones to be ent accents of spills.</li> <li>Spill control rocedures: It tablish our safe ontainment and clean-up procedures, including ensure that so are cleant or promptly and safely to prevent slips and falls are on minimer and interest wisible warning signs and hazard symbols in areas where fertilise an stored to used to alert workers to potential risks and hazards.</li> <li>Good In usek poing: Maintain a clean and clutter-free work environment by not larly liveepin and cleaning floors, removing trip hazards, and organising tools and property.</li> <li>Regular spections of the work area: Conduct routine inspections of the vispace to ensure good housekeeping practices are being maintained and to identify and address any potential hazards.</li> <li>Safe handling guidelines: Develop and communicate guidelines outlining the correct use, handling, and disposal of fertilisers to all workers at the job site.</li> <li>Ventilation: Ensure proper ventilation, such as open windows or mechanical ventilation systems, to help disperse any hazardous fumes from the fertiliser.</li> <li>Emergency response plan: Establish a comprehensive emergency response plan that outlines steps to be taken in case of an accident, including who to contact, evacuation procedures, and first aid provisions.</li> </ul>	1L	
2. Storage	Fire hazard, Incompatible chemical reactions	ЗН	<ul> <li>Proper storage facilities: Ensure that fertilizers are stored in a well-ventilated, cool, and dry area, away from direct sunlight, heat sources, or potential ignition points.</li> <li>Chemical compatibility: Segregate incompatible chemicals or fertilizers to prevent accidental mixing or contact, which may cause hazardous chemical reactions. Consult Material Safety Data Sheets (MSDS) for information on compatibility.</li> <li>Clear labeling: Clearly label all containers with the specific type of fertilizer and include appropriate hazard symbols, warnings, and handling instructions as per manufacturer guidelines.</li> </ul>	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Fire prevention: Install fire alarms, smoke detectors, and appropriate fire extinguishers near the storage area. Conduct regular equipment checks and ensure staff are trained in their use.		
			- Spill containment: Establish spill containment asures to confine any potential leakage or spills within the storage area, sure as installing bunds or secondary containment systems.		
			- Storage capacity limits: Avoid overstocking at sample excessive amounts of fertilizers to minimise risk. Adhere to local regular as regarding lorage capacity limits.		
			- Emergency response notice of the span and implement the emergency response plan, including immedity action to be then in case of fire or chemical accidents. Regularly retrieval and update the plants necessary.		
			- Staff faining, psure the all personn, andling or working around fertilizers are trained proper by g, storage techniques, and the potential risks associated with fully rs.		
			- Inspections of main nance: Conduct regular inspections of the storage area for signs of the storage area for signs of the storage area for national storage signs of the storage area for signs of the signs of the storage area for signs of the storage area for signs of the sign of the signs of the sign of		
			- Re isteraccess: Limit access to authorised personnel only and implement a vstern ep track of who enters and exits the storage area.		
			- rsonal protective equipment (PPE): Provide employees handling fertilizers with appropriate PPE, such as gloves, safety goggles, and respirators (if required), to minimise exposure and protect their health. Ensure employees are trained in the correct use and maintenance of PPE.		
			- Provide proper training: Ensure all team members involved in handling fertilizers are adequately trained on safe lifting techniques and appropriate handling methods to reduce the risk of back injuries and puncture wounds.		
			- Use appropriate Personal Protective Equipment (PPE): Equip workers with necessary PPE such as gloves, safety boots, long sleeve shirts, and pants to protect against puncture wounds and skin irritation from fertilizer contact.		
3. Handling	Back injuries, Puncture wounds	2M	- Implement mechanical aids: Utilise equipment like pallet jacks, trolleys, or forklifts for moving heavy loads of fertilizers to minimise manual handling and reduce the risk of back injuries.	1L	
			- Correct lifting posture: Encourage workers to always bend their knees while lifting and maintain a straight back to minimise strain on the spine during manual handling tasks.		
			- Practice good housekeeping: Regularly remove clutter and obstacles from the working area, ensuring clear pathways and reducing the chance of tripping or stumbling while handling fertilizers.		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON	
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON	
			- Store materials properly: Securely store fertilizers in designated areas, using sturdy shelving or pallet systems to prevent containers from falling and causing puncture wounds or back injuries.			
			- Rotate duties: Schedule regular breaks and the workers between different tasks to avoid prolonged strain on muscles and its, which cap lead to potential back injuries.			
			- Utilise teamwork: Encourage workers to work over, using a "buddy system" when lifting heavy loads or moving large quantity of fertilizer continuing individual risks of injury.			
			- Properly label control Clea label all fertilizer or unners, detailing the contents and approximation, so vorkers are aware of potential risks before trading.			
			- Monitor and to lew work procedures. Induously evaluate the effectiveness of implemented countries and seek feedback from workers on ways to further minimals as duratine handling of fertilizers.			
				- Establish a largency rocedures: Develop and communicate a plan for responding to accidents a lated to handling fertilizers, such as puncture wounds or ack injuries, energing workers are aware of steps to take in case of an emergency.

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

	Tollow ally sale work instructions which are provided, and agrees to use all reisonal riotective Equipment where appropriate.

		SAF WO A S	THUD STATEMENT	MONITORING AND	REVIEW		
The SWMS must be reviewed regularly to take sure it remains effective and must be reviewed (and revised if necessary) if relevant control measure are accessed. It is not well as a process should be carried out in consultation with workers (including contractors are subcontracted) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.  When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the review as the twill will be involved in the work must be provided with the relevant information and instruction that will assist			The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:  1. Spot Checks. 2. Consultation with workers, contractors and sub-contractors. 3. Internal audits on a continual basis.  An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures				
them to understand and imp					tently developing ever-imp	<b>3</b> ,	' '

### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting so tions.			
Responsible person is assigned and listed on the SWMS for the imperent of continue assures.			
Permit requirements specified, such as Hot Work, Veralt Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed are noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
dentifies any hazardous substances used with specific control measures in line with any SDS.
