Contact Person:	Phone: [Phone]	E gil:								
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PLOF THE PROJECT								
Under the Work Health and Safety Regulation (WHS Regulation), a person conducte proposed work starts.	cting a business or undertaking (H BU) is	required to thurs at a safe work method s	tatement (SWMS) is prepared before							
Full Name:										
Signature:		Title:	Date:							
Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS well as reviews and modifications of the SWMS.										
Full Name:		Title:	Phone:							
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	ALL RELEVANT PERSONNEL WHO HAVE B OPMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND							
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conduct of unical those hazards and then to further take steps to either conduct or conduct educate or conduct educate.	NAME	SIGNATURE	DATE							
If an incident or a near miss occurs, all work must supervised by the material of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.										
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.										
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips and trips, Electrical hazards	2М	 Ensure the work area is clean and uncluttered before starting to minimise the risk of slips and trips. Inspect all electrical equipment, including the user stripper machine and extension cords, for any visible damage or wear before sage. Utilise non-slip footwear appropriate for the task and teat working conditions, to provide better traction and prevent slipping. Mark out the designated we sing area with temp any barrier signage, or hazard tape to alert others and restrict nauthorised access. Conduct a proper user sinspution of the work environment, identifying potential slip, trip, and enviroal hazards that any arise storing the floor stripping process. Keep all electrical cords of wires circumater or damp surfaces, using cord proteines, and other area ating in stancing water without taking proper precautions. Provise dequate thing around the work area, ensuring visibility of potential hazard is to compute use of or electrical equipment have residual current evices without stating and trips while using the floor stripper. Ensure the tapporpriate Personal Protective Equipment have residual current evices withos) installed to protect against potential electrical shock risks. Ne the appropriate Personal Protective Equipment (PPE), such as gloves and salety glasses, to protect yourself from various hazards associated with the floor stripping process. Follow the manufacturer's guidelines and workplace procedures when operating the floor stripper, adhering to recommended safe working practices. Keep all unnecessary personnel away from the work area while the floor stripping process. Regularly inspect equipment and initiate routine maintenance schedules to ensure its performance remains efficient and reduces the likelihood of breakdowns leading to potential electrical hazards. 	1L	
2. Moving equipment	Manual handling injuries, Collisions	2M	 Provide manual handling training to all workers involved in moving the equipment, which should include instructions on proper lifting techniques and safe carrying practices. Use mechanical aids, like trolleys or hand trucks, whenever possible to help move heavy or bulky equipment safely and efficiently. Assign a designated path for transporting equipment with clear signage to avoid worker or pedestrian collisions. Ensure that the route for moving equipment is free from any obstructions or hazards that could cause trips, slips or falls. 	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- When possible, schedule equipment transport during less busy times of the day to minimise exposure to other workers or pedestrians.		
			- Implement a buddy system where two or more we sets can assist each other in moving heavy or awkward loads, helping to rective the risk of manual handling injuries.		
			- Wear appropriate personal protective equipeent (P ^r), such as steel-toed boots, gloves, and high-visibility vests to protect again the ential injuries during movement of equipment.		
			- Ensure that all workers are as the of emergency set browns or switches on equipment so they or thiskly set down machinery conazardous situation arises during transport		
			- Communic, and coordinge with the arway teams on site to guarantee awareness and inderstancing of equip at movement timings and locations, reduce the risk contraints.		
			- Enco a open comunication among team members by discussing tasks and seeking assurance with needed, helping them feel confident and empowered to work satisfy.		
			to entrepresent and maintain mechanical aids (such as trolleys and hand trucks) to entrepresent reliability, secure footing, and readiness for use.		
			Pesigna, a qualified and experienced worker to oversee the moving process and neutor equipment handling, ensuring adherence to safety protocols and identify potential concerns before they escalate.		
	G		- Review and update the Safe Work Method Statement (SWMS) regularly to reflect any changes in equipment or work conditions, ensuring continued safety compliance and effective hazard control measures.		
			 Inspect electrical equipment: Before setting up the machine, ensure all electrical components, including cords and plugs, are in good condition to prevent electric shock. 		
			 Use appropriate personal protective equipment (PPE): Workers should wear appropriate PPE such as gloves, safety glasses, and closed-toe shoes to protect themselves from potential hazards when operating the floor stripper machine. 		
3. Setting up machine	Electric shock, Caught in moving parts	ЗH	- Check for power isolation: Ensure the area around the machine is clear of water and switch off any nearby electrical outlets to reduce the risk of an electrical hazard when setting up the machine.	1L	
			- Turn off the machine during setup: Make sure the floor stripper machine is switched off and unplugged while being set up to prevent any inadvertent activation and risk of caught-in incidents.		
			 Keep hands and loose clothing away from moving parts: Workers should be reminded to keep their hands and loose clothing away from any moving parts of the machine while it is being set up to avoid getting caught or injured. 		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Proper training: All workers who are responsible for setting up the machine should be adequately trained and aware of the various risks associated with the process, allowing them to take appropriate precautions to minute hazards.		
			- Follow manufacturer's guidelines: Always added to the manufacturer's guidelines and recommendations when setting up the machine, as they are designed to mitigate potential hazards and ensure safe paration.		
			- Regular maintenance checks: Conduct routine schenance checks on the floor stripper machine to make sure that there are not blems or is the stat might affect its safe and efficient function.		
			- Set up in a well-lit are contilated area: Ensure the weakspace is well-lit and adequately ventile at to reace the isk of accidents during the setup process.		
			- Establish a exclusion zo . Set up, clear marked exclusion zone around the machine, ensuing that on authorised moonnel can access the area. This will help contribute risk or periodical contact with the machine and other hazards associated with s it, sup the support.		
4. Using floor stripper	Chemical exposure, Noist hazare	ЗН		1L

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAL WO A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to review the sure it remains revised if necessary) if relevant control measure are a conconsultation with workers (including contractors are subcontract of the SWMS and their health and safety representatives who re workplace.

ke sure it remains effective and must be reviewed (and area of the process should be carried out in s and subcontract s) who may be affected by the operation esentatives who received that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWN			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting sections.			
Responsible person is assigned and listed on the SWMS for the imement of cont, measures.			
Permit requirements specified, such as Hot Wey, Electrical Work, Verat Heights etc.			
SWMS identifies plant and equipment to be up t.			
Details of inspection checks required for any equipment listed approved on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
