

**Generator Portable | SAFE WORK METHOD STATEMENT (SWMS)**

**TASK OR ACTIVITY: Generator Portable**

Business Name: [Company Name]		ABN: [ABN]	SWMS#
Business Address: [Company Address]			
Contact Person:	Phone: [Phone]	Email:	

**THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT**

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:			
Signature:		Title:	Date:

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, as well as reviews and modifications of the SWMS.

Full Name:		Title:	Phone:
------------	--	--------	--------

**ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED** | **NAME AND DATED SIGNATURE OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS**

	NAME	SIGNATURE	DATE
Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, to conduct and communicate those hazards and then to further take steps to either eliminate or control each hazard.			
If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.			

**CLIENT OR PRINCIPAL CONTRACTOR DETAILS**

Client:	SCOPE OF WORKS Provide a detailed description of the specific work being carried out (otherwise known as scope of works).
Project Name:	
Project Address:	
Project Manager:	
Contact Phone:	
Project Manager Signature:	
Date SWMS supplied to Project Manager:	

**ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT**

<input type="checkbox"/> involves a risk of a person falling more than 2 meters.	<input type="checkbox"/> is carried out on or near pressurised gas mains or piping.
<input type="checkbox"/> is carried out on a telecommunication tower.	<input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines.
<input type="checkbox"/> involves demolition of an element of a structure that is load-bearing.	<input type="checkbox"/> is carried out on or near energised electrical installations or services.
<input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure.	<input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere.
<input type="checkbox"/> involves, or is likely to involve, disturbing asbestos.	<input type="checkbox"/> involves tilt-up or precast concrete.
<input type="checkbox"/> involves structural alteration or repair that requires temporary supports to prevent collapse.	<input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor.
<input type="checkbox"/> is carried out in or near a confined space.	<input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant.
<input type="checkbox"/> is carried out in/near a shaft or trench deeper than 1.5m or tunnel involving use of explosives.	<input type="checkbox"/> is carried out in areas with artificial extremes of temperature.
<input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning.	<input type="checkbox"/> involves diving work.

**ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY**

<input type="checkbox"/> Forklift	<input type="checkbox"/> Crane/s	<input type="checkbox"/> Hoist/s	<input type="checkbox"/> Excavator	<input type="checkbox"/> Backhoe/Loader	<input type="checkbox"/> Boom Lift	<input type="checkbox"/> EWP	<input type="checkbox"/> Genie Lift
<input type="checkbox"/> Trencher	<input type="checkbox"/> Drilling Rig	<input type="checkbox"/> Trucks	<input type="checkbox"/> Formwork	<input type="checkbox"/> Bobcat	<input type="checkbox"/> Flammable Gas	<input type="checkbox"/> Fuel	<input type="checkbox"/> Dozer
<input type="checkbox"/> High Voltage	<input type="checkbox"/> Mulcher	<input type="checkbox"/> Tilt-up Panels	<input type="checkbox"/> Roller	<input type="checkbox"/> Scissor Lift	<input type="checkbox"/> Tractor	<input type="checkbox"/> Other -	

**RISK MATRIX**

LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	<b>Elimination</b> Remove the hazard.
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	<b>Substitution</b> Replace the hazard.
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	<b>Isolation</b> Isolate People from the hazard
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	<b>Engineering</b> Isolate the hazard.
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records	<b>Administrative</b> Change the work. <b>PPE</b>

**Notes on Hierarchy of Controls:** Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.

**PERSONAL PROTECTIVE EQUIPMENT (PPE)**

FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EYE/FACE PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS; and,
3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Trips and falls, Electrical hazards	2M	<ul style="list-style-type: none"> <li>- Conduct a thorough inspection of the work area prior to commencing the task, identifying any trip hazards such as cables, equipment or uneven surfaces, and eliminating them where possible.</li> <li>- Clearly mark any identified hazards that cannot be eliminated with high visibility tape or warning signs to alert all workers in the area.</li> <li>- Maintain a clean and organised work area, keeping walkways and access routes free from clutter and debris throughout the duration of the task.</li> <li>- Regularly inspect equipment, including extension leads and electrical connections, for damage or wear prior to use, removing faulty equipment from service and reporting it for repair or replacement.</li> <li>- Ensure that portable generators are positioned on flat, stable surfaces away from water sources and at a safe distance from the work area to minimise the risk of electrical hazards from spills or exposure to moisture.</li> <li>- Implement a safety briefing before commencing work, educating all workers on the potential risks involved and explaining the importance of following Safe Work Method Statements (SWMS).</li> <li>- Thoroughly check that all loads being transported, stored, and used in the work area are secure and well-balanced, reducing the chance of unexpected movements causing injury or falls.</li> <li>- Always use appropriate Personal Protective Equipment (PPE), such as anti-slip footwear and protective gloves, to reduce the risk of injury in the event of encountering a hazard.</li> <li>- Use only tested and tagged electrical equipment, and ensure that Residual Current Devices (RCDs) are installed to provide additional protection against electrical hazards.</li> <li>- Establish an emergency response plan for the worksite, ensuring that all personnel are familiar with relevant safety procedures and clearly marked evacuation routes.</li> <li>- Schedule regular safety audits and toolbox talks to maintain awareness of workplace hazards, evaluate control measures, and promote a safety-first culture among all workers.</li> </ul>	1L	
2. Site inspection	Uneven surfaces, Sharp objects	2M	<ul style="list-style-type: none"> <li>- Regular site inspections: Ensure that regular site inspections are conducted to identify and assess potential hazards such as uneven surfaces, sharp objects, and other dangers.</li> <li>- Install warning signs: Place appropriate warning signs in the areas where there may be a risk of uneven surfaces or sharp objects, alerting workers to proceed with caution.</li> <li>- Clear walking paths: Ensure that walking paths are clear and free from debris, ensuring workers have a safe path to maneuver around the worksite, avoiding hazardous areas.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Provide adequate lighting: Make sure the worksite has sufficient lighting for workers to see where they are walking and identify any hazards on the ground easily.</li> <li>- Use personal protective equipment (PPE): Workers should wear appropriate PPE, including sturdy work gloves and steel-capped boots to protect hands and feet from potential harm caused by sharp objects or uneven surfaces.</li> <li>- Implement good housekeeping practices: Maintain a clean and organised worksite by regularly removing debris and waste materials, mitigating the risk of tripping hazards or contact with sharp objects.</li> <li>- Train staff on hazard identification: Educate workers on how to identify potential hazards, such as uneven surfaces or sharp objects, and report them to their supervisors for immediate action.</li> <li>- Assess load-bearing capacity: Check the load-bearing capacity of the ground at the workplace, ensuring it can support the weight of the portable generator, minimising the risk of subsidence.</li> <li>- Use marking systems: If necessary, establish designated walkways using cones or temporary fencing to channel foot traffic safely away from hazardous areas.</li> <li>- Level uneven surfaces: Where possible, level out any uneven surfaces at the worksite using sand, gravel, or other suitable materials to minimise the risk of trips and falls.</li> <li>- Store and dispose of sharp objects safely: Properly store and dispose of any potentially sharp objects, such as screws, nails, or glass fragments, in designated containers to eliminate the risk of injury.</li> <li>- Conduct risk assessments: Perform regular risk assessments of the worksite, documenting potential hazards like uneven surfaces or sharp objects and implementing corrective actions to minimise the risks associated with them.</li> <li>- Encourage a safety culture: Promote open communication among workers regarding safety concerns, fostering a culture where everyone takes responsibility for their own and their coworkers' wellbeing on the worksite.</li> </ul>		
3. Generator placement	Crush injuries, Noise exposure	2M	<ul style="list-style-type: none"> <li>- Conduct a thorough risk assessment before placing the generator, identifying potential crush injury risks and suitable locations considering noise exposure.</li> <li>- Ensure adequate signage and hazard tape are used to mark the area around the generator, alerting workers of potential hazards.</li> <li>- Train workers who will be involved in placing the generator on proper handling techniques to minimise the potential for injuries.</li> <li>- Implement a buddy system where multiple workers collaborate on the placement of the generator, promoting communication, and a shared responsibility for safety.</li> <li>- Utilise appropriate Personal Protective Equipment (PPE) such as steel-toed boots, gloves, and noise-cancelling earmuffs or earplugs when working with the generator.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Ensure generator is placed on a stable and level surface to prevent it from moving or toppling over, especially during operation.</li> <li>- Consider placing barriers or fencing around the generator to prevent unauthorised access and minimise the risk of accidental contact.</li> <li>- Encourage regular breaks and rotation of tasks among workers to minimise the duration of exposure to noise and reduce the risk of hearing damage.</li> <li>- Implement an effective maintenance and inspection schedule for the portable generator to ensure its safe and efficient operation, including regular checks on anti-vibration mounts, exhaust systems, and other safety features.</li> <li>- Establish clear procedures and protocols for emergency situations, such as spills or accidents involving the generator, and ensure all workers are familiar with these procedures.</li> </ul>

**SIGNATORIES OF THE SAFE WORK METHOD STATEMENT**

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

**SAFE WORK METHOD STATEMENT MONITORING AND REVIEW**

**The SWMS must be reviewed regularly** to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are needed. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

**The SWMS must be monitored regularly** for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

**SAFE WORK METHOD STATEMENT REVIEW CHECKLIST**

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
