THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PLOOF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (r 3U) is	required to ture at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE B PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with agislative requirements to first identify any site hazards, conditions unical those hazards and then to further take steps to either the conditions are or conditions.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips, trips and falls, Incorrect tool usage	2M	 Ensure that the work area is clean and free of obstacles, debris, and any potential slip or trip hazards. Properly mark and cordon off the work zone to estrict unauthorised personnel and maintain established pathways. Inspect all tools and equipment prior to use ansuring ney are in good working condition and suitable for the task at hand. Provide appropriate training all workers involve in the bit or boring process, ensuring they understand the crect tool usage, pointial azards, and safety precautions. Enforce a strict policy on oper to wear without also be to minimise the risk of slips and fallow the workples. Recomposed to work appropriate posonal protective equipment (PPE) such as safety uses, give and ear protection when operating equipment and tools. Estation idelines or wearing high-visibility vests or clothing, particularly in areas where in any particular or vehicles are operating. Taplement a bit by system or supervision protocol to ensure team members can superficiely and maintain an up-to-date hazard communication plan to keep all takers informed about risks and control measures associated with the project. Regularly inspect work surfaces, aisles, and walkways for tripping hazards or slippery conditions, taking corrective action promptly. Maintain proper storage solutions for tools and equipment to prevent accidental misuse or injury. Implement an ongoing safety awareness programme that includes regular toolbox talks and refresher training to reinforce safe practices among employees. Conduct routine audits and inspections of the work environment, highlighting potential hazards and areas for improvement; engage workers in finding solutions. Encourage employees to report unsafe conditions or behaviours immediately, fostering a robust safety culture and promoting open communication within the workplace. 	1L	
2. Setup work area	Working at height, Electrical hazards	3Н	- Conduct a thorough risk assessment before starting any work to identify potential hazards and establish appropriate control measures Ensure all workers have received proper training in working at height and are aware of the specific safety procedures, including the use of personal protective equipment (PPE) Set up the work area by clearly marking designated walkways and providing safety barriers or warning signs where necessary to prevent unauthorised access.	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			Check that all equipment used for working at height, such as ladders and scaffolding, is in good condition, properly maintained, and inspected regularly.		
			- Implement a fall protection system when working meights, including the use of harnesses, anchor points, and fall arrest system		
			- Utilise lockout/tagout procedures for electronal equipments the work area to prevent accidental electrocution during setup and teamwin.		
			- Keep extension cords and power tools away in water source, and always use ground-fault circuit interrupted SFCI) protected on its to mississe the risk of electrical hazards.		
			- Inspect all power cos, ds, a electrical equipment prior to use to ensure they are in proper training cond in another of dame. Report any faulty equipment immediately repair or resistement.		
			- Praggood usel ping in the wor area to prevent tripping hazards, such as keep bles a propose organised and out of walkways.		
			- Community ewith the workers in the area to make them aware of potential hazards and cointain the lines of communication regarding any changes in the work encountry.		
			- Leablist an emorgency response plan, including designated first-aid responders, avacuation procedures, and contact information for local emergency services, should incident occur during the setup of the work area.		
			Proper manual handling techniques: Ensure all workers are trained in correct lifting methods, including bending at the knees and keeping the back straight, to reduce the risk of injuries while handling materials.		
			- Use of mechanical aids: Whenever possible, utilise mechanical aids such as trolleys, forklifts, or hoists to move heavier materials and minimise manual handling tasks.		
2 Assess materials	Maguel handling injuries Cham adges	OM	- Work in teams: Encourage team lifting for heavy or awkward-sized materials to distribute the load and reduce physical strain on individuals.	41	
Assess materials	Manual handling injuries, Sharp edges	2M	- Wear appropriate PPE: Require workers to wear appropriate personal protective equipment (PPE) like gloves, safety boots, and protective eyewear to prevent contact with sharp edges or other hazards.	1L	
			- Regular hazard identification: Conduct frequent inspections of the worksite to identify any potential sharp edges, obstructions, or hazardous materials and take appropriate measures to mitigate risks.		
			- Proper storage of materials: Store materials in designated areas to ensure adequate space and organisation, reducing the likelihood of mishandling or contact with hazards.		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Educate workers about hazard recognition: Train employees to identify different types of hazards present in their work environment, allowing them to take necessary precautions during material assessment.		
			- Implement a clear communication system: For msh a system for notifying all workers of potential dangers when assessing a handling materials, such as using signage, flags, or a buddy system.		
			- Apply edge guards and covers: Install protection vices on sharp edges and corners to prevent accidental outs or abrasions of ing material and ing.		
			- Encourage regular breaks: A v workers to take a ula yeaks throughout the day to rest and recover to phy all exertion assoch a with material assessment and handling.		
			- Maintain go housekeer g practice Key workspaces clean and free of clutter, debris or obstacles that and increase ansk of accidents during material hand		
			- Rota was ters because tasks: Assign workers to different tasks throughout the day to due repetition motions and associated strain on muscles and joints.		
			Implement a corting system: Establish a way for workers to report any identified ards, ose correctual incidents related to material handling for prompt inversely in and corrective action.		
			Monitor and review control measures: Regularly evaluate the effectiveness of the temented control measures, making adjustments as needed to ensure continued wo aplace safety during the assessment of materials.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting so tions.			
Responsible person is assigned and listed on the SWMS for the imperent of continue assures.			
Permit requirements specified, such as Hot Work, Veralt Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed are noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
dentifies any hazardous substances used with specific control measures in line with any SDS.
