

Hydraulic Panbrake	SAFE WORK METHOD S	TATEMENT (SWMS)	
TAS	SK OR ACTIVITY: Hydraulic Panb	rake	
Business Name: [Company Name]		ABN: [ABN]	SWMS#
Business Address: [Company Address]			
Contact Person:	Phone: [Phone]	E fil:	
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE P. OF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (N 3U) is	required to ture at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	compliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED		LL RELEVANT PERSONNEL WHO HAVE B PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with agislative requirements to first identify any site hazards, conditions unical those hazards and then to further take steps to either the conditions are or conditions.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must stead attely. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Select me appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Falling object hazard, potential for burns from hot surfaces	ЗН	- Conduct a thorough risk assessment: This should be the first step before any activity begins. Identify potential hazards associated in the task and outline control measures to manage or reduce those risks. - Implement mandatory training: All worker wolved in the task should undergo a detailed training that is focussed on safety percenters to the handle equipment and how to respond in case of an emergency. - Regular equipment checks: The Hydraulic Panil ke should be suitinely inspected for any wear and tear or main actions. - Use of appropriate it as all Projective Equipment (1972): Ensure that all workers are provided with and allw to wear aquired PPE ruch as protective gloves, safety helmets, hear a sistant cloting and the protection. - Safe fork are Design of a safe worked where only trained individuals are allowed uring to protection of the hydraulic panbrake. - Keep to works the: Keeping the workspace clean and clear of tripping/falling hazard will reduce the risk of accidents. Restriction access to hot surfaces: Where possible, use barriers or guards to isolate in areas. Cook or riod: Allow adequate cooling periods after usage to minimize burn to a reas. Cook or riod: Allow adequate cooling periods after usage to minimize burn to a reas. - Now manufacturer's guidelines: Always operate machinery per the manufacturer's instructions. - Emergency stop devices: Make sure emergency stop devices are effectively functioning and easily accessible. - Load securing: Properly secure loads before manipulation with the panbrake to prevent dislodgement and potential injuries. - Overload prevention: Never exceed the recommended load weight for the equipment. Maintain the load within the capacity of the hydraulic panbrake. - Emergency procedures: Have comprehensible emergency procedures in place and ensure they are well communicated to all workers. - First Aid facilities: Ensure all staff have received first-aid training and that adequate facilities are available onsite.	2M	
2. Hydraulic panel setup	Risk of crushing, electrical hazards	4A	- Ensure that only trained and competent workers operate the Hydraulic Panbrake, limiting the risk of improper use that could lead to accidents. - Regularly service and maintain the hydraulic panel set to ensure it is in good working order. - Employ a lock-out/tag-out system to prevent any accidental start-ups when maintenance or repair work is being performed.	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Always wear appropriate personal protective equipment (PPE), such as safety boots, gloves, hard hats, and high visibility clothing.		
			- Establish a safe working zone around the Hydrau analysis and barricades.		
			- Assess and manage electrical hazards by, gular inspection, installation of residual current devices (RCDs), and ensuring all political leads to off the ground and away from water.		
			- Develop an emergency procedure for situations colving or electrical shocks.		
			- Follow the manufacture manufactor setup and operation of the Hydraulic Panbrake.		
			- Avoid placin, ands or fit ers near a parts while the machine is in operation.		
			- Alw discond machine from the power source when not in use.		
			- No lo se othing, s, jewellery or long hair should be permitted in the vicinity of the manife avoid sidents.		
			Enclose or issue electrical components of the machinery to reduce the exposure to evil is or our electrical hazards.		
	1		Regulates and inspections should be conducted to evaluate and thus engther the safety controls effectively.		
			Ensure all electrical equipment including the hydraulic panbrake are regularly inspected and maintained by a qualified electrician.		
			- Utilise Residual Current Devices (RCDs) to provide a level of protection against electric shock.		
			- Encourage regular breaks from work to avoid unnecessary fatigue which can lead to clumsiness or lack of focus when handling electrical equipment.		
			- Keep floors free from clutter and clean up any spills immediately to reduce risk of slipping or tripping.		
3. Safety checks	Electrical hazards, slips and trips due to cluttered workspace	3H	- Clearly mark all potential trip hazards in high traffic areas.	1L	
	outlored workepade		- Provide proper storage solutions for tools and materials to eliminate clutter within the workspace.		
			- Adhere to strict policies of not operating machinery with wet hands or while standing on damp or wet surfaces.		
			- Require employees to wear appropriate safety footwear that provides adequate traction.		
			- Display signage regarding electrical safety, trip hazards and other related workplace health and safety reminders.		
			- Include routine checks of the workspace as part of health and safety protocols.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.
