Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

| JOB STEP | POTENTIAL HAZARDS | IR | CONTROL MEASURES | RR | RESPONSIBLE PERSON |
|---------------------|---|-----------------|--|------------------|--------------------|
| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK | NAME OF PERSON |
| 1. Preparation | Trip hazards from cords, Manual handling injuries | 2M | Clearly mark and cover cords with cable protectors or organise them in such a way to reduce the risk of tripping, minimising clutter on the work floor. Store all materials needed for the job within and preach to avoid improper manual handling, specifically bending and reaching. Provide appropriate personal protective equament (a.e.) such as slip-resistant footwear, gloves, and suitable clothing – ensuit to mixers are wearing this gear at all times. Implement regular safety bris togs/ toolbox talks with wars to address and identify potential had an ensuit to employees are avoid of correct manual handling techniques and other precipions. Implement to veter to intest and cointain equipment regularly, ensuring machiatry, calls, and hor aulic power tows are without faults or damage. Use to sanical as such as trolleys, pallet jacks or lifting devices wherever possible it to hinimis manual handling risks. Train brike hin proposities of lifting and handling techniques, including the correct see of michanical aids and teamwork for heavy or awkward items. Exhibits clear walking paths, so workers know where it is safe to walk and avoid trip had an organized paths, so workers know where it is safe to walk and avoid trip had as or equipment may be present. Place caution signs or barriers around any areas where cables or other trip hazards cannot be eliminated or moved. Review and update existing risk assessments regularly, taking into account changes to the work environment and the introduction of new equipment or tasks that may pose additional hazards. Encourage workers to report any concerns or near miss incidents involving trip hazards or manual handling issues, allowing for continuous improvement in workplace safety measures. | 1L | |
| 2. Inspection | Electric shock, Hydraulic fluid leaks | 3H | Regularly inspect and maintain all electrical equipment, including power cords and connections, to ensure proper functioning and compliance with Australian Standards (AS 3000). Implement a stringent inspection routine before starting any task involving hydraulic power packs, focusing on identifying potential hydraulic fluid leaks or damages. Ensure that all workers have received appropriate training in recognising hazards associated with electrical shocks and hydraulic fluid leaks and are aware of the proper procedures in place to address them. Always utilise tools and equipment with appropriate voltage ratings, insulation, and grounding to prevent electric shocks when working around hydraulic power packs. | 1L | |

| JOB STEP | POTENTIAL HAZARDS | IR | CONTROL MEASURES | RR | RESPONSIBLE PERSON | | | | | | | | |
|---------------------|--------------------------|-----------------|--|------------------|---|--|--|--|--|--|--|--|--|
| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK | NAME OF PERSON | | | | | | | | |
| | | | - Conduct regular risk assessments to identify and rectify any potential issues related to electrical or hydraulic systems in the workplace. | | | | | | | | | | |
| | | | - Establish designated safety zones and cordoned areas around hydraulic power packs, restricting access only to authorised per anel with proper qualifications and experience. | | | | | | | | | | |
| | | | - Maintain an up-to-date inventory of all hydrocic comments, hoses, and parts, ensuring that they meet the required Australian countries and comply with manufacturers' specifications | | | | | | | | | | |
| | | | - Implement a mandatory 'lock (tagout' procedure to strong down and isolating hydraulic power pacture) ing my tenance or repair to minimise the risk of electric shocks of posume a hydraulic fluid leak | | | | | | | | | | |
| | | | - Properly state and dispose of hydra afflure according to Australian environmental regulations and anufacturers' guideling preventing potential spillages or contained to our restation of the state of | | | | | | | | | | |
| | | | - Enco a open a munication between workers and management, fostering a solid report, culture rany detected hazards or concerns related to electrical or hydraul, syst, s with the workplace. | | | | | | | | | | |
| | 6 | | - Co. Let a comprehensive risk assessment to identify and determine appropriate quipmed election based on the specific task requirements. | | | | | | | | | | |
| | | | - pvide clear instructions and guidelines on the appropriate use of equipment, including limitations and capabilities, to all relevant personnel involved in the setup process. | | | | | | | | | | |
| | | | | | | | | | | | - Ensure that workers are adequately trained in the correct setup procedures, handling, and use of hydraulic power packs and any associated equipment. | | |
| | Incorrect equipment sele | | | | - Implement pre-start inspections to identify any damaged or faulty equipment prior to commencement of work, removing it from service until repairs or replacements can be conducted. | | | | | | | | |
| 3. Setup | points | 2M | - Enforce strict adherence to manufacturer guidelines and specifications when assembling hydraulic power packs and related components. | 1L | | | | | | | | | |
| | | | - Utilise suitable personal protective equipment (PPE) such as gloves and safety footwear to minimise the risk of injury from pinch points during the setup process. | | | | | | | | | | |
| | | | - Establish exclusion zones around the work area to prevent unauthorised personnel from accessing and potentially interfering with equipment setup. | | | | | | | | | | |
| | | | - Encourage open communication between team members, promoting timely reporting of any potential hazards or issues that may arise during the setup process. | | | | | | | | | | |
| | | | - Regularly reassess and review setup procedures, identifying opportunities for improvement and implementing changes as necessary to maintain a safe working environment. | | | | | | | | | | |

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.
