JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips, trips and falls, Chemical exposure	2М	 Proper Housekeeping: Ensure regular cleaning and maintenance of the work area to remove any clutter, debris or spills that may cause lips, trips and falls. Adequate Lighting: Ensure there is appropriate and even lighting in the workspace to prevent hazards caused by poor visibility. Signage and Markings: Place visible warning signs is useas where potential slip, trip and fall hazards may exist, such as wet flot or useven surfaces or obstructed pathways. Non-Slip Flooring: Install non-tip flooring materials or proving areas prone to becoming slippery. If the proving and the proving and the surfaces or charactal storage. Correct Footnan: Requirement was not machines or charactal storage. Correct Footnan: Requirement on the proving material or proving the proving slippery. If the proving the proving the proving storage and disposal process rates of the proving storage, and disposal process rates of a storage. Safer Data Stores (Sup): Make sure are employees handling chemicals are familie to the new SDS, which outlines proper handling, storage, and disposal process rates are accurately storace. Person I Preactive to tipment (PPE): Provide staff with appropriate PPE, such as ploves, a ggle and abons when handling chemicals to protect against potential sure. Chemic Storage: Store all chemicals in properly labelled containers, away from text heas sources, and ensure they are easily accessible but safely stored to in timise accidents and spillages. Training and Education: Ensure all staff are trained in safe workplace practices, including correct lifting techniques, hazard identification, and the use of PPE. Emergency Response Plan: Develop an emergency response plan that clearly outlines the actions to be taken in the event of a chemical spill or injury, ensuring all staff know how to access first aid kits and eyewash stations. 	1L	
2. Machine setup	Caught-in machinery, Electrocution	ЗH	 Proper machine installation: Ensure that all laundry machines are installed according to the manufacturer's guidelines, including the correct clearances between machines and other equipment or walls. Lockout/tagout procedures: Implement lockout/tagout procedures for all machinery during setup, maintenance, and repair to ensure that machines are de-energised and cannot accidentally start up, reducing the risk of caught-in machinery incidents. Safe equipment design: Choose laundry machinery that has built-in safety features such as guardrails, emergency stop buttons, and locking devices to prevent accidental contact with moving parts. Regular inspections: Conduct regular inspections and maintenance of laundry machines to identify any potential hazards, such as loose wires or damaged components, and address issues promptly to minimise the risk of electrical shock. Worker training: Provide comprehensive training on the proper machine setup, operation, and maintenance procedures to ensure employees understand potential 	2M

			hazards and are aware of appropriate safety precautions, reducing the likelihood of caught-in machinery and electrocution incidents.				
			- Personal protective equipment (PPE): Require encoyees to wear appropriate PPE, such as gloves and safety goggles, during an phases of machine setup to protect against the risk of caught-in machine and electrosution hazards.				
			- Equipment grounding: Verify that all machine v is prevently grounded according to local codes and regulations to reduce the risk and according.				
			- Clear workspaces: Maintain clutter-free works, be around a machines and equipment to prevent tripping in tumbling while set quit are machinery, potentially leading to serious accurate.				
			- Emergency recedures: a ablish that emergency response protocols for incidents inviting caught-inachine for en acoution, and provide first aid training for all vorkers inhandle ergencies, any and effectively.				
				- Ong the communication: Encourage open communication among employees regard of tential transformation and near-miss incidents to promote a culture of safety and fact tath ontinue timprovement in workplace health and safety practices.			
			 oper training, insure that all employees involved in sorting laundry are thore, bl. trained in correct manual handling techniques to reduce the risk of njuries. opnomic Design: Design the laundry sorting workstations with ergonomics in mixe, including adjustable heights and comfortable seating for workers. 				
	C				- Use of Mechanical Aids: Introduce the use of mechanical aids such as trolleys, carts or conveyor belts to help move heavy loads around the workplace and minimise manual handling.		
2. Conting lowed at	Manual handling injuries, the uck		- Gradual Lifting Techniques: Encourage workers to lift loads gradually, using their legs instead of their back and maintaining a straight spine while lifting to prevent injuries.	41			
3. Sorting laundry	injury	2M	 Appropriate Protective Equipment: Provide appropriate personal protective equipment (PPE) such as gloves, aprons, and safety goggles to protect against needlestick injuries and other hazards. 	1L			
			 Safe Disposal Practices: Implement safe disposal practices, including designated puncture-proof containers for sharps, to reduce the likelihood of accidental exposure to sharp objects contaminated with biological materials. 				
			- Standard Operating Procedures: Adhere to established standard operating procedures (SOPs) for sorting and handling laundry, ensuring proper communication and reporting of hazards or concerns.				
			 Posture Checks and Work Breaks: Encourage regular posture checks and appropriate breaks for workers, allowing them to stretch and rest, reducing the risk of sustaining long-term injuries due to repetitive motions.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAF WC A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to review the sure it remains revised if necessary) if relevant control measure are a conconsultation with workers (including contractors are subcontract of the SWMS and their health and safety representatives who re workplace.

ke sure it remains effective and must be reviewed (and are subcontractions) who may be affected by the operation sentatives who received that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWN			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting sections.			
Responsible person is assigned and listed on the SWMS for the imement of cont, measures.			
Permit requirements specified, such as Hot Wey, Electrical Work, Verat Heights etc.			
SWMS identifies plant and equipment to be up t.			
Details of inspection checks required for any equipment listed approved on the SWMS.			
Describes any mandatory qualifications, experience vaining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
