

## Lifting Equipment | SAFE WORK METHOD STATEMENT (SWMS)

### TASK OR ACTIVITY: Lifting Equipment

Business Name: [Company Name]

ABN: [ABN]

SWMS#

Business Address: [Company Address]

Contact Person:

Phone: [Phone]

Email:

### THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:

Signature:

Title:

Date:

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, as well as reviews and modifications of the SWMS.

Full Name:

Title:

Phone:

ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED

NAME AND DATED SIGNATURE OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS

Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then to communicate those hazards and then to further take steps to either eliminate or control each hazard.

If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.

Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.

The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

## ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT

<input type="checkbox"/> involves a risk of a person falling more than 2 meters.	<input type="checkbox"/> is carried out on or near pressurised gas mains or piping.
<input type="checkbox"/> is carried out on a telecommunication tower.	<input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines.
<input type="checkbox"/> involves demolition of an element of a structure that is load-bearing.	<input type="checkbox"/> is carried out on or near energised electrical installations or services.
<input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure.	<input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere.
<input type="checkbox"/> involves, or is likely to involve, disturbing asbestos.	<input type="checkbox"/> involves tilt-up or precast concrete.
<input type="checkbox"/> involves structural alteration or repair that requires temporary support to prevent collapse.	<input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor.
<input type="checkbox"/> is carried out in or near a confined space.	<input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant.
<input type="checkbox"/> is carried out in/near a shaft or trench deeper than 1.5m or tunnel involving use of explosives.	<input type="checkbox"/> is carried out in areas with artificial extremes of temperature.
<input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning.	<input type="checkbox"/> involves diving work.

## ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY

<input type="checkbox"/> Forklift	<input type="checkbox"/> Crane/s	<input type="checkbox"/> Hoist/s	<input type="checkbox"/> Excavator	<input type="checkbox"/> Backhoe/Loader	<input type="checkbox"/> Boom Lift	<input type="checkbox"/> EWP	<input type="checkbox"/> Genie Lift

RISK MATRIX											
LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS			
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			<b>Elimination</b> Remove the hazard.			
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	<b>Substitution</b> Replace the hazard.			
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	<b>Isolation</b> Isolate People from the hazard			
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	<b>Engineering</b> Isolate the hazard.			
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records	<b>Administrative</b> Change the work.			
<b>Notes on Hierarchy of Controls:</b> Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.											
<b>PERSONAL PROTECTIVE EQUIPMENT (PPE)</b>											
FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EYE PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED
											
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).											
<p><b>Note:</b> A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.</p> <p>When a SWMS has been revised, the person conducting a business or undertaking must ensure all:</p> <ol style="list-style-type: none"> <li>persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;</li> <li>persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS; and,</li> <li>workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.</li> </ol>											

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Musculoskeletal risks, Slip and trip hazards	2M	<ul style="list-style-type: none"> <li>- Conduct a thorough risk assessment: Prior to any work involving lifting equipment, undertake a comprehensive risk assessment to identify potential hazards and the necessary controls to be implemented.</li> <li>- Provide relevant training: Ensure that all workers involved in the operations are adequately trained in manual handling techniques, correct use of lifting equipment and recognizing potential hazards.</li> <li>- Clearly mark designated walkways: Maintain clearly marked, designated walkways around the work area to reduce the risks of slips, trips, and falls.</li> <li>- Regular inspection and maintenance: Ensure that all lifting equipment is regularly inspected for faults or damage, and maintained according to the manufacturer's guidelines.</li> <li>- Establish clear communication channels: Implement clear communication protocols among team members to avoid confusion during the preparation process and throughout the job.</li> <li>- Correct selection of equipment: Use appropriate lifting equipment for the specific task, taking into account the weight, size and shape of the load to be lifted.</li> <li>- Keep work area clean and organised: Ensure that the work area is kept tidy and free from obstruction or unnecessary equipment that may pose slip and trip hazards.</li> <li>- Appropriate personal protective equipment (PPE): Workers should wear suitable PPE, such as non-slip footwear and gloves, to minimise the risk of injury due to slips and trips or manual handling accidents.</li> <li>- Proper manual handling techniques: Encourage workers to practice good posture and proper lifting techniques when manually handling loads, to reduce the risk of musculoskeletal injuries.</li> <li>- Use mechanical aids when possible: Utilise mechanical lifting aids, where feasible, to minimise the need for manual handling and reduce the risk of injury.</li> <li>- Adequate lighting: Ensure that the work area is well-lit in order to reduce the chances of accidents caused by poor visibility.</li> <li>- Implement an emergency response plan: Develop and communicate an emergency response plan to all workers in case an accident occurs, including identifying first aid supplies and trained personnel on-site.</li> <li>- Continuous monitoring and review: Monitor the implementation of control measures, make necessary adjustments as new hazards are identified, and provide ongoing feedback to staff to reinforce safe work practices.</li> </ul>	1L	
2. Inspection	Falling objects, Eye injuries	2M	<ul style="list-style-type: none"> <li>- Conduct thorough pre-operation inspections of all lifting equipment, including slings, hooks, chains, and hoists to identify any signs of damage, wear, or malfunction.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Ensure all workers involved in lifting operations are adequately trained and competent in the safe use and inspection of the equipment and the specific procedures related to their task.</li> <li>- Make sure workers wear appropriate personal protective equipment (PPE) such as hard hats, safety glasses or goggles, and gloves to prevent injury from falling objects or potential eye injuries.</li> <li>- Implement a rigid exclusion zone around the work area to keep unauthorised personnel at a safe distance from potential falling objects.</li> <li>- Use tag lines or guide ropes to control suspended loads and minimise the risk of swinging or uncontrolled movement, which could lead to falling objects or eye injuries.</li> <li>- Ensure that lifting equipment is properly maintained and inspected regularly by a qualified technician to address any issues before they pose a hazard during operation.</li> <li>- Utilise lifting bags or containers with secure lids when transporting loose materials to prevent spills or falling objects.</li> <li>- Establish clear communication protocols between workers involved in the lifting process, using radios or hand signals, to ensure everyone is aware of the ongoing operations and position themselves safely.</li> <li>- Use safety nets, debris screens, or catch platforms for overhead work to contain falling objects and minimise the risk of injuries below the work area.</li> <li>- Properly mark and label all lifting equipment with their respective weight capacities, ensuring workers are aware of the limits and avoid overloading.</li> <li>- Implement a regular housekeeping schedule for the worksite to maintain clean and organised workspaces, reducing the likelihood of tripping hazards and subsequent falling objects.</li> <li>- Encourage worker feedback and incident reporting related to hazards or near misses, providing an opportunity to adjust safety practices and maintain a proactive approach to workplace health and safety.</li> <li>- Continuously review and update the Safe Work Method Statement (SWMS) in line with new equipment, changes to the work environment, or evolving industry best practices to ensure ongoing safety.</li> <li>- Provide ongoing training and refresher courses for all workers involved in lifting operations to keep their skills current and reinforce safe work practices.</li> </ul>		
3. Transportation on-site	Collision with pedestrians or vehicles, Falling equipment	3H	<ul style="list-style-type: none"> <li>- Clearly mark and designate specific pathways for the transportation of lifting equipment to avoid possible collisions with pedestrians or vehicles.</li> <li>- Implement a traffic management plan, including designated drop-off and pick-up locations, as well as proper signage to control both pedestrian and vehicular flow.</li> </ul>	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Train all workers involved in transporting equipment on safe handling and maneuvering techniques, ensuring that they are aware of their surroundings and can react appropriately should a hazard arise.</li> <li>- Implement an efficient communication system among workers, such as using two-way radios, to ensure everyone is updated about the movement of equipment and any changes in the workflow.</li> <li>- Equip all lifting equipment with safety features like flashing lights or audible alarms to make them highly visible while being transported on-site.</li> <li>- Reduce the speed limit within the construction site, especially around areas where heavy lifting equipment is being transported, to minimize the risk of accidental collisions.</li> <li>- Assign a dedicated spotter or monitoring staff guiding the equipment operator during on-site transportation to ensure adherence to the safety guidelines and prevent mishaps.</li> <li>- Regularly inspect and maintain lifting equipment to ensure it is in good working condition, addressing any issues promptly to prevent equipment failures and accidents during transportation.</li> <li>- Require all workers to wear appropriate high-visibility personal protective equipment (PPE), such as vests, while performing transportation tasks to ensure they are easily visible to equipment operators.</li> <li>- Establish and enforce proper loading and unloading procedures for the lifting equipment, including weight distribution and load securing methods, to prevent falling equipment during transportation.</li> <li>- Schedule regular safety meetings and toolbox talks to reinforce safe work practices, share updates on potential hazards, and address concerns related to on-site transportation of lifting equipment.</li> <li>- Conduct routine inspections of the site and equipment staging areas to ensure compliance with established safety guidelines and identify potential risks that may contribute to accidents or near-miss incidents involving the transportation of lifting equipment.</li> </ul>

## SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

## SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

**The SWMS must be reviewed regularly** to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are needed. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

**The SWMS must be monitored regularly** for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

## SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.	<input type="checkbox"/>	<input type="checkbox"/>	
Names and signatures of all relevant personnel consulted during the development of the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Specific personnel and qualifications, experience is noted in the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Provides a step-by-step process of tasks required to carry out the activity or task.	<input type="checkbox"/>	<input type="checkbox"/>	
Adequate risk assessment of any identified hazards has been completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Foreseeable hazards are identified and documented for each step.	<input type="checkbox"/>	<input type="checkbox"/>	
Any hazards listed in any site risk assessments have been added to the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Check control measures added to the SWMS are the most effective solutions.	<input type="checkbox"/>	<input type="checkbox"/>	
Responsible person is assigned and listed on the SWMS for the implementation of control measures.	<input type="checkbox"/>	<input type="checkbox"/>	
Permit requirements specified, such as Hot Work, Electrical Work, Work at Heights etc.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS identifies plant and equipment to be used.	<input type="checkbox"/>	<input type="checkbox"/>	
Details of inspection checks required for any equipment listed are noted on the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Describes any mandatory qualifications, experience, training, skills required to perform the work.	<input type="checkbox"/>	<input type="checkbox"/>	
Applicable personal protective equipment is selected on the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Lists any required permits or licenses.	<input type="checkbox"/>	<input type="checkbox"/>	
Reflects and documents any legislative references and/or Australian Standards.	<input type="checkbox"/>	<input type="checkbox"/>	
Identifies any hazardous substances used with specific control measures in line with any SDS.	<input type="checkbox"/>	<input type="checkbox"/>
