

**Pallet Wrapper | SAFE WORK METHOD STATEMENT (SWMS)**

**TASK OR ACTIVITY: Pallet Wrapper**

Business Name: [Company Name] ABN: [ABN] SWMS#

Business Address: [Company Address]

Contact Person: Phone: [Phone] Email:

**THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT**

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:

Signature: Title: Date:

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, as well as reviews and modifications of the SWMS.

Full Name: Title: Phone:

**ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED** NAME AND DATED SIGNATURE OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS

	NAME	SIGNATURE	DATE
Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, conditions and then to communicate those hazards and then to further take steps to either eliminate or control each hazard.			
If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.			

**CLIENT OR PRINCIPAL CONTRACTOR DETAILS**

Client:	SCOPE OF WORKS Provide a detailed description of the specific work being carried out (otherwise known as scope of works).
Project Name:	
Project Address:	
Project Manager:	
Contact Phone:	
Project Manager Signature:	
Date SWMS supplied to Project Manager:	

**ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT**

<input type="checkbox"/> involves a risk of a person falling more than 2 meters.	<input type="checkbox"/> is carried out on or near pressurised gas mains or piping.
<input type="checkbox"/> is carried out on a telecommunication tower.	<input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines.
<input type="checkbox"/> involves demolition of an element of a structure that is load-bearing.	<input type="checkbox"/> is carried out on or near energised electrical installations or services.
<input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure.	<input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere.
<input type="checkbox"/> involves, or is likely to involve, disturbing asbestos.	<input type="checkbox"/> involves tilt-up or precast concrete.
<input type="checkbox"/> involves structural alteration or repair that requires temporary supports to prevent collapse.	<input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor.
<input type="checkbox"/> is carried out in or near a confined space.	<input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant.
<input type="checkbox"/> is carried out in/near a shaft or trench deeper than 1.5m or tunnel involving use of explosives.	<input type="checkbox"/> is carried out in areas with artificial extremes of temperature.
<input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning.	<input type="checkbox"/> involves diving work.

**ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY**

<input type="checkbox"/> Forklift	<input type="checkbox"/> Crane/s	<input type="checkbox"/> Hoist/s	<input type="checkbox"/> Excavator	<input type="checkbox"/> Backhoe/Loader	<input type="checkbox"/> Boom Lift	<input type="checkbox"/> EWP	<input type="checkbox"/> Genie Lift
<input type="checkbox"/> Trencher	<input type="checkbox"/> Drilling Rig	<input type="checkbox"/> Trucks	<input type="checkbox"/> Formwork	<input type="checkbox"/> Bobcat	<input type="checkbox"/> Flammable Gas	<input type="checkbox"/> Fuel	<input type="checkbox"/> Dozer
<input type="checkbox"/> High Voltage	<input type="checkbox"/> Mulcher	<input type="checkbox"/> Tilt-up Panels	<input type="checkbox"/> Roller	<input type="checkbox"/> Scissor Lift	<input type="checkbox"/> Tractor	<input type="checkbox"/> Other -	

**RISK MATRIX**

LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	<b>Elimination</b> Remove the hazard.
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	<b>Substitution</b> Replace the hazard.
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	2M MODERATE	Ensure control measures in place.	<b>Isolation</b> Isolate People from the hazard
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	1L LOW	Monitor and keep records	<b>Engineering</b> Isolate the hazard.
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH			<b>Administrative</b> Change the work.
								<b>PPE</b>

**Notes on Hierarchy of Controls:** Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.

**PERSONAL PROTECTIVE EQUIPMENT (PPE)**

FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EYE/FACE PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

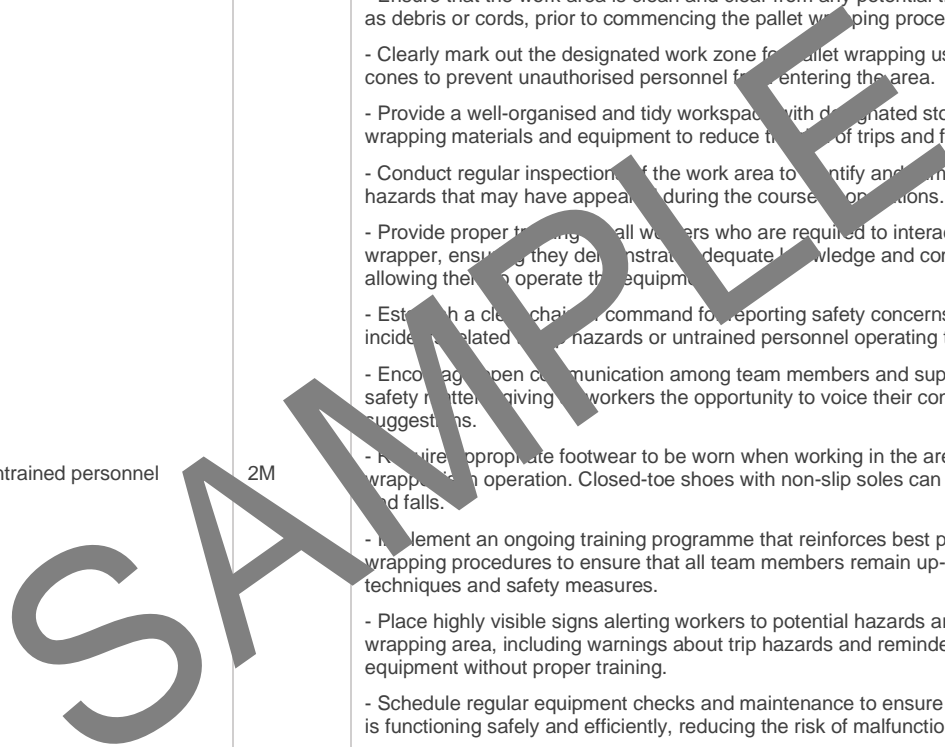

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

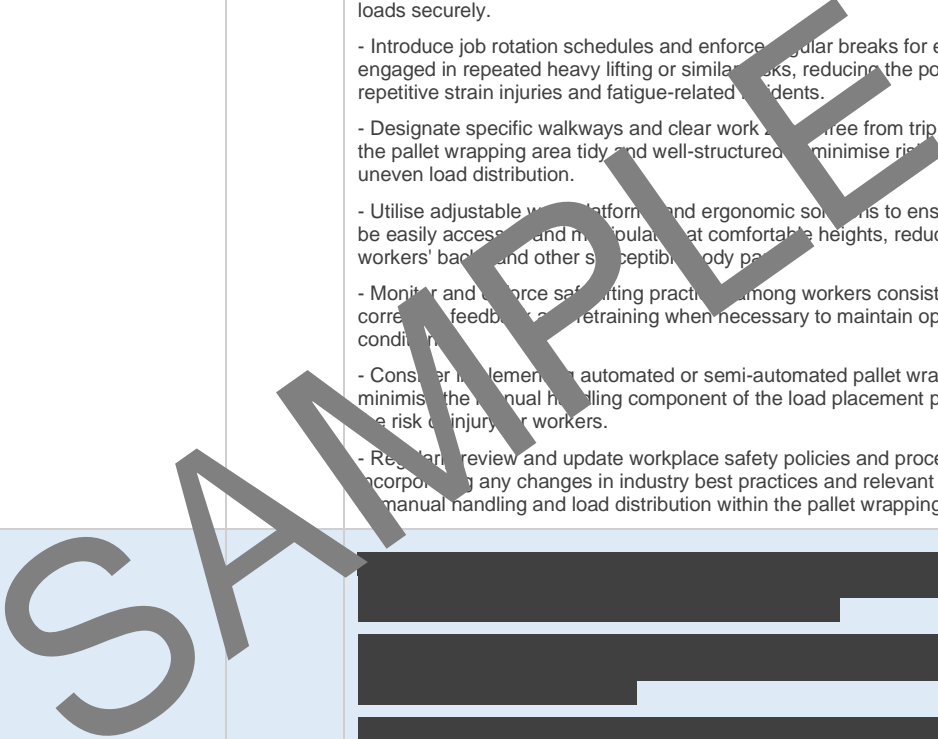

1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS; and,
3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Trip hazards, Untrained personnel	2M	<ul style="list-style-type: none"> <li>- Ensure that the work area is clean and clear from any potential trip hazards, such as debris or cords, prior to commencing the pallet wrapping process.</li> <li>- Clearly mark out the designated work zone for pallet wrapping using hazard tape or cones to prevent unauthorised personnel from entering the area.</li> <li>- Provide a well-organised and tidy workspace with designated storage areas for all wrapping materials and equipment to reduce the risk of trips and falls.</li> <li>- Conduct regular inspections of the work area to identify and eliminate any new trip hazards that may have appeared during the course of operations.</li> <li>- Provide proper training for all workers who are required to interact with the pallet wrapper, ensuring they demonstrate adequate knowledge and competency before allowing them to operate the equipment.</li> <li>- Establish a clear chain of command for reporting safety concerns, near misses, or incidents related to trip hazards or untrained personnel operating the pallet wrapper.</li> <li>- Encourage open communication among team members and supervisors regarding safety matters, giving all workers the opportunity to voice their concerns and suggestions.</li> <li>- Require appropriate footwear to be worn when working in the area where the pallet wrapper is in operation. Closed-toe shoes with non-slip soles can help minimise slips and falls.</li> <li>- Implement an ongoing training programme that reinforces best practices for pallet wrapping procedures to ensure that all team members remain up-to-date on proper techniques and safety measures.</li> <li>- Place highly visible signs alerting workers to potential hazards around the pallet wrapping area, including warnings about trip hazards and reminders not to use the equipment without proper training.</li> <li>- Schedule regular equipment checks and maintenance to ensure the pallet wrapper is functioning safely and efficiently, reducing the risk of malfunction-related injuries.</li> <li>- Develop an emergency response plan for incidents involving trip hazards or untrained personnel interacting with the pallet wrapper, outlining roles, responsibilities, and steps to take for rapid resolution of potential hazards.</li> <li>- Restrict access to the pallet wrapper controls and operating instructions to authorised and trained personnel only, ensuring that the equipment is only used by those who are qualified to do so.</li> <li>- Promote a strong safety culture within the workplace by regularly reinforcing the importance of adhering to established safety guidelines and procedures for pallet wrapping operations.</li> </ul>	1L	
2. Pallet Inspection	Splinters, Nails protruding	3H	<ul style="list-style-type: none"> <li>- Provide appropriate Personal Protective Equipment (PPE) such as gloves, safety glasses, and steel-toed boots for employees handling pallets.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Implement a mandatory pallet inspection routine before using them in the pallet wrapping process to identify any splinters, protruding nails or other hazards.</li> <li>- Establish clear protocols for reporting damaged or hazardous pallets to supervisors for immediate assessment and disposal or repair if required.</li> <li>- Conduct regular training sessions for staff on hazard identification, specifically focusing on recognizing and managing risks associated with splinters and protruding nails.</li> <li>- Provide tools such as pliers, hammers, and sandpaper for employees to fix minor issues like removing or hammering down protruding nails and smoothing out splintered areas.</li> <li>- Implement proper stacking techniques and storage solutions for pallets, ensuring they are stored flat and neat to reduce the likelihood of damage and subsequent hazards.</li> <li>- Promote an ergonomic workspace design, including adjustable workstations and easy access to frequently used equipment or tools, to minimise physical strain and discomfort for workers dealing with pallets.</li> <li>- Define designated walking paths and keep pallet inspection areas free from clutter and obstructions to avoid accidents due to tripping or falling on protruding nails or splinters.</li> <li>- Regularly inspect and maintain all equipment and tools used during the pallet inspection process to ensure their optimal performance and safety.</li> <li>- Encourage a positive safety culture in the workplace by rewarding employees that follow safe work practices, open discussions on potential hazards, and ideas for improvement.</li> <li>- Perform regular workplace safety audits and inspections to monitor compliance with established control measures and promptly address any identified gaps in safe pallet handling practices.</li> </ul>		
3. Load placement	Manual handling injury, Uneven load distribution	2M	<ul style="list-style-type: none"> <li>- Provide adequate training for employees on proper manual handling techniques and the use of mechanical aids to prevent injuries during load placement.</li> <li>- Encourage workers to perform stretching and warm-up exercises before starting work, to reduce the risk of muscular strains and sprains.</li> <li>- Implement a two-person lift policy for loads exceeding safe lifting limits, as specified by workplace health and safety guidelines.</li> <li>- Require workers to use appropriate personal protective equipment (PPE), such as gloves and steel-capped boots, to prevent injury during manual handling activities.</li> <li>- Install anti-slip flooring material around the pallet wrapper workstation to minimise the risk of slips, trips, and falls related to uneven load distribution.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Conduct regular maintenance and inspections of the pallet wrapper machine and its components, ensuring that it is in good working order and able to handle uneven loads securely.</li> <li>- Introduce job rotation schedules and enforce regular breaks for employees engaged in repeated heavy lifting or similar tasks, reducing the potential for repetitive strain injuries and fatigue-related incidents.</li> <li>- Designate specific walkways and clear work zones free from trip hazards, keeping the pallet wrapping area tidy and well-structured to minimise risks associated with uneven load distribution.</li> <li>- Utilise adjustable work platforms and ergonomic solutions to ensure that loads can be easily accessed and manipulated at comfortable heights, reducing the strain on workers' backs and other susceptible body parts.</li> <li>- Monitor and enforce safe lifting practices among workers consistently, offering corrective feedback and retraining when necessary to maintain optimal safety conditions.</li> <li>- Consider implementing automated or semi-automated pallet wrapping machines to minimise the manual handling component of the load placement process, reducing the risk of injury for workers.</li> <li>- Regularly review and update workplace safety policies and procedures, incorporating any changes in industry best practices and relevant legislation relating to manual handling and load distribution within the pallet wrapping workspace.</li> </ul>

**SIGNATORIES OF THE SAFE WORK METHOD STATEMENT**

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

**SAFE WORK METHOD STATEMENT MONITORING AND REVIEW**

**The SWMS must be reviewed regularly** to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are needed. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

**The SWMS must be monitored regularly** for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

**SAFE WORK METHOD STATEMENT REVIEW CHECKLIST**

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.
