requirements to first identify any site hazards, conduction inical those	NAME	SIGNATURE	DATE		
on the severity of the incident, a meeting will be called with all workers to amend					
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.					
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips, trips and falls, manual handling injuries	2М	<ul> <li>Ensure all work areas are clean, organised and free from any debris or obstacles that may cause slips, trips or falls.</li> <li>Conduct a thorough risk assessment before commencing work to identify potential hazards and implement necessary controlation.</li> <li>Provide appropriate safety signage and balances clean indicating possible slip, trip and fall hazards in the work area.</li> <li>Adopt correct manual handow techniques when bring, carrow, pushing or pulling heavy materials, such as bend wat the knees, not ne work, and keeping the load close to the body.</li> <li>Provide training of staff on afe montal handling practices, including proper lifting techniques a susing mechnical aid when er possible.</li> <li>Userent-slip hor matter areas prone of wet or slippery surfaces, and promptly clean to my pill to ensure they are in good pondo in and we for use, and remove any defective items from service immediately.</li> <li>Instrument an incident reporting system for employees to report any unsafe conditioned rung and falls, including first aid measures and procedures for contacting emergency services.</li> <li>Encourage open communication between employees and management regarding workplace safety concerns, adopting a proactive approach to mitigate risks associated with slips, trips and falls.</li> <li>Monitor and review control measures implementation regularly, updating safety policies and procedures as needed based on findings and feedback from employees.</li> </ul>	1L	
2. Material Handling	Forklift accidents, struck by objects	2M	<ul> <li>Ensure proper training and certification for all forklift operators to decrease the likelihood of accidents due to inexperience or lack of skill.</li> <li>Regularly inspect and maintain forklift equipment to ensure it is in safe working condition, minimising the risk of equipment failure leading to accidents.</li> <li>Establish designated pathways for forklifts, and keep these areas clear of obstructions and debris to reduce the chances of collisions or falling objects.</li> <li>Implement a strict system of communication between forklift operators and other staff members, such as verbal and visual signals or two-way radios, to enable greater awareness of movement and potential hazards.</li> <li>Use spotters during complex or tight maneuvers to guide forklift operators and help prevent accidents.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul> <li>Mandate that all workers wear appropriate personal protective equipment (PPE), including hard hats, high visibility clothing, and steel-toed boots, to minimise injury in case of an accident.</li> <li>Implement a policy requiring forklift operators uswitch off the forklift engine and engage the parking brake when not in use much prevents accidental starting or rolling.</li> <li>Limit the speed of forklifts within the workplace operation of collisions alloss of control.</li> <li>Clearly mark storage areas we signage and barrier equipment (PPE), inductive again of the second securely and intergramed manner to reduce the risk of objects falling onto workers or causil coostrol in n. ths.</li> <li>Encourage aguent many handline raining sessions so that staff members understand house lift and arry heavy one correctly, thus minimising injuries result from the preventing the strain on workers and the likelihood of an accident occurrir</li> <li>Olement a "open-as-you-go" policy in the workplace, encouraging staff members to include the risk of time of alls.</li> <li>Onduct regular safety audits to identify and address any unsafe practices or conditions related to material handling, ensuring that all control measures are being effectively implemented and that any new hazards are quickly addressed.</li> </ul>		
3. Cutting	Hand or body injuries from the saw blade, dust inhalation	ЗН	<ul> <li>Ensure all workers have completed appropriate training for operating cutting tools, including safety procedures for reducing risk of injury from saw blades.</li> <li>Provide personal protective equipment (PPE) such as safety goggles, gloves, and ear protection to reduce the potential hazards associated with cutting operations.</li> <li>Install blade guards and other safety features on cutting equipment to minimise direct contact with the saw blade during operation.</li> <li>Develop and enforce a strict "no-touch" rule around the cutting area, requiring workers to keep a safe distance from the saw blade at all times.</li> <li>Regularly inspect and maintain cutting equipment to ensure they are in proper working condition and that all safety features are functioning correctly.</li> <li>Implement a lockdown procedure for any machinery or equipment involved in cutting operations, ensuring all power sources are disconnected before cleaning, maintenance, or blade changes are conducted.</li> </ul>	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Establish clear communication protocols among team members to notify others when cutting operations are occurring, allowing them to take necessary precautions and avoid entering the immediate work area.		
			- Utilise vacuum systems or other dust extraction methods to minimise dust inhalation hazards and maintain a clean wrongbace.		
			- Encourage workers to take regular breaks any from the cutting area to help reduce exposure to dust and noise, contributing the error overall wellbeing.		
			- Implement an emergency a con plan to quickly tress approxential incidents involving cuts or injuries during utting operations, a udit provision of first aid supplies and person prined in their use.		
			- Continuously a date and mmulti site workplace health and safety policies, ensuring that is employeer inderstation their sites and responsibilities in maintaining a safe work encomment

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

#### SAF WC A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to review the sure it remains revised if necessary) if relevant control measure are a conconsultation with workers (including contractors are subcontract of the SWMS and their health and safety representatives who re workplace.

ke sure it remains effective and must be reviewed (and are subcontractions) who may be affected by the operation sentatives who received that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

#### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWN			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting sections.			
Responsible person is assigned and listed on the SWMS for the imement of cont, measures.			
Permit requirements specified, such as Hot Wey, Electrical Work, Verat Heights etc.			
SWMS identifies plant and equipment to be up t.			
Details of inspection checks required for any equipment listed approved on the SWMS.			
Describes any mandatory qualifications, experience vaining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
