#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

| Worker Name | Position | Signature | Date  | Time | Supervisor |

#### SAF WC A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to review the sure it remains revised if necessary) if relevant control measure are a conconsultation with workers (including contractors are subcontract of the SWMS and their health and safety representatives who re workplace.

ke sure it remains effective and must be reviewed (and are subcontractions) who may be affected by the operation sentatives who received that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

#### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

| ITEMS WHICH MUST BE INCLUDED IN THE SWMS  | COMPLETED | TO BE DONE | COMMENTS |
|---|-----------|------------|----------|
|   |           |            |          |
| The company details have been entered, including the project name and address.                  |           |            |          |
| Names and signatures of all relevant personnel consulted during the development of the SWMS.    |           | P          |          |
| Name, signature, position and date signed of the person approving the SWMS.                     |           |            |          |
| Specific personnel and qualifications, experience is noted in the SWMS.                         |           |            |          |
| Provides a step-by-step process of tasks required to carry out the activity or task.            |           |            |          |
| Adequate risk assessment of any identified hazards has been completed.                          |           |            |          |
| Foreseeable hazards are identified and documented for each step.                                |           |            |          |
| Any hazards listed in any site risk assessments have been added to the SWN                      |           |            |          |
| SWMS initial risk (IR) column as well as residual risk (RR) columns completed.                  |           |            |          |
| Check control measures added to the SWMS are the most effecting sections.                       |           |            |          |
| Responsible person is assigned and listed on the SWMS for the imement of cont, measures.        |           |            |          |
| Permit requirements specified, such as Hot Wey, Electrical Work, Verat Heights etc.             |           |            |          |
| SWMS identifies plant and equipment to be up t.   |           |            |          |
| Details of inspection checks required for any equipment listed approved on the SWMS.            |           |            |          |
| Describes any mandatory qualifications, experience vaining skills required to perform the work. |           |            |          |
| Applicable personal protective equipment is selected on the SWMS.                               |           |            |          |
| Lists any required permits or licenses.   |           |            |          |
| Reflects and documents any legislative references and/or Australian Standards.                  |           |            |          |
| Identifies any hazardous substances used with specific control measures in line with any SDS.   |           |            |          |
