	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must stead the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips, trips and falls, Manual handling injuries	2M	- Conduct proper housekeeping: Keep the work area clean and organised, ensuring that there are no loose objects or debris on the floor fat can cause slips, trips, and falls. - Ensure adequate lighting: Verify that the acceptace is well-lit, making it easier for workers to see potential hazards and avoid to sidents. - Proper footwear: Encourage all employees to appropriate footwear with good traction to reduce the risk of slipping or tripping. - Safe lifting techniques: Train a ployees in proper and chandling techniques, including how to lift had accided a felly to minimise to ask of injury. - Use mechapic adds: What posses a use mentional lifting devices such as pallet jacks, trolley or rhoists to a sist with a print argor or heavy objects. - Post unages as play to ar signs indiction go potential hazards, such as wet floors or unever a faces, a whind workers to take extra precautions. - Implement regula paintenance schedule: Regularly maintain and inspect the roll bender puip and an orkplace to quickly identify and address any potential hazards. - Enablish designated walkways: Clearly mark walking paths and keep them free from to an ations, helping workers navigate the area safely and efficiently. - The blish designated walkways: Clearly mark walking paths and keep them free from to an ations, helping workers navigate the area safely and efficiently. - The blish designated walkways: Clearly mark walking paths and keep them free from to an ations, helping workers navigate the area safely and efficiently. - Communicate about ongoing risks: Regularly communicate with the team regarding any identified hazards so they can adjust their actions accordingly. - Monitor employee workload: Prevent injuries resulting from overexention by adequately managing workloads and giving employees enough time for breaks or task rotations. - Periodic safety audits: Conduct regular safety reviews to ensure that control measures are being implemented correctly and effectively to keep workers safe. - Implement an incident r	1L	
2. Inspection	Electrical hazards, Equipment failure	2M	 Regular electrical inspections: Ensure all electrical components of the Roll Bender, including power cords and plug connections, are checked and maintained by a qualified electrician regularly to prevent electrical hazards. Turn off and unplug the equipment when not in use: Ensure the Roll Bender is turned off and properly unplugged from its power source when not in use to minimise the risk of unintended startup or electrical shock. 	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			 Pre-start equipment checks: Before using the Roll Bender, conduct a thorough inspection of the equipment, ensuring all parts are secure, free from damage, and functioning as intended. Emergency stop button: Ensure the Roll Bender has a running and accessible emergency stop button that is checked for other function before each use. Training and competency: Only trained and competency workers should be allowed to operate the Roll Bender, maximising safety of aducing the risk of equipment failure. Personal protective equipment (PPE): All operaton on the represented working near the Roll Bender on wear to propriate PPE, such as gloves, safety glasses, and hearing protection, to digate of tential injuriest associated with equipment failure. Provide clean disible site age: Displa, confing signs around the Roll Bender area to influe worken of the presence of electrical hazards, the importance of maint in disafe or atting procedures, and the risk of equipment failure. Implement ckouth out procedures: Establish and enforce a lockout/tagout procedure to charter the he Roll Bender is properly shut down and secured during poairs, hainten once, or other situations where accidental activation could pose a ris. Use procedure to the proper lifting techniques to avoid strain injuries and reduce the publishity of causing equipment damage. Scheduled preventative maintenance: Develop a routine maintenance schedule for the Roll Bender to identify and address potential equipment failures before they become hazardous. Addressing liquid spills promptly: Any spills of hydraulic fluid or coolant should be cleaned up immediately to limit the risk of slips, falls, and contamination that could contribute to equipment failure or electrical hazards. Keep the area around Roll Bender clean and organised: Ensure the work area is free from clutter, trip hazards, and unnecessary equipment to promote safety and reduce the likelihood of accidents or equipment		
3. Setup	Entanglement, Crush injuries	ЗН	Provide thorough training and clear instructions to workers regarding setup procedures, including proper equipment handling to prevent entanglement or crush injuries. Ensure that operators wearing appropriate personal protective equipment (PPE) such as safety gloves, footwear, and eyewear to minimise risk of injury during the setup process.	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Perform regular inspection and maintenance on roll bender equipment to prevent malfunctions and ensure all parts are in good working order.		
			- Utilise machine guards and safety devices during a setup process to protect against entanglement and crush injuries. The should be properly installed according to manufacturer's guidelines.		
			- Establish a safe work zone around the roll and der, we clearly marked boundaries and signage to keep unauthorised personnel and de distance.		
			- Implement standard operate procedures (SOF) for stopping and starting the roll bender machine during setup, auding lockout/tag produces to prevent accidental startup.		
			- Encourage of a communication is ween work to dentify potential hazards and address any incerns related to the suppresses.		
			- Assistancement of crivisor to over see the setup process, ensuring that all control pasures are implemented and adhered to by the workers.		
		- Develop a Limple ont an emergency response plan in case of accidents or incident duly the scorp process, including immediate access to first aid and trained person.			
	•		- Now expacts clean, organised, and free from any obstacles or clutter that could be oute to accidents or injuries during the roll bender setup process.		
			egularly review and update SWMS and control measures based on worker few back and experiences, ensuring continuous improvement in workplace health and safety standards.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting so tions.			
Responsible person is assigned and listed on the SWMS for the imperent of continue assures.			
Permit requirements specified, such as Hot Work, Veralt Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed are noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
dentifies any hazardous substances used with specific control measures in line with any SDS.
