THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE P. OF THE PROJECT						
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (I BU) is	s required to ture for a safe work method s	statement (SWMS) is prepared before					
Full Name:								
Signature:		Title:	Date:					
Details of the person(s) responsible for ensuring implementation, monitoring a	compliance of the SWMS well as review	ws and modifications of the SWMS.						
Full Name:		Title:	Phone:					
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A	ALL RELEVANT PERSONNEL WHO HAVE B OPMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND					
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conduct or unical those hazards and then to further take steps to either chare or contract a hazard.	NAME	SIGNATURE	DATE					
If an incident or a near miss occurs, all work must study unately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.								
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.								
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	HAZARDS THAT MAY ARISE		 Conduct comprehensive workplace inspections to identify any potential hazards, such as loose wires or uneven surfaces, ensuring the the area is clear of obstacles before commencing work. Provide adequate task-specific training for unworkers using the roller compactor, including proper equipment handling and mictenance in cedures. Implement a pre-start check to ensure the roll of unpactor and its components are in good working order, with any defects or issues using reported and collisions. Establish designates to elestria to all space to a tool slips, trips, and collisions. Install apple traite signage income in working to access and reduce the risk desired states and helping to the total of unpactor's operating are inhelping to the total unauthorised access and reduce the risk desired state. Requite a supervise to expective to a tool slips, trips, and collisions. Install apple traite signage income the version of the roller compactor's operating are inhelping to the total unauthorised access and reduce the risk desired state. Requite a supervise to expect the version of the roller compactor they will be using. Devect to site-specific, documented Safe Work Method Statement (SWMS) for on the roller compactor they will be using. Devect site-specific, documented Safe Work Method Statement (SWMS) for uses, and regularly reviewing and updating the document. Maintain a clean and organised worksite, minimising clutter that could potentially cause slips, trips, or falls, and decreasing the likelihood of incorrect equipment usage. Create and implement clear communication protocols between roller compactor operators and ground staff, helping to coordinate activities and reduce the risk of accidents. Encourage workers to take regular breaks to reduce fatigue, resulting in increased awareness of potential hazards and a decrease in the risk of slips, trips, and incorrect equipment usage. Regularly re		NAME OF PERSON
			extinguishers, ensuring that workers are trained in their use and how to respond effectively during an emergency situation.		
2. Equipment inspection	Faulty equipment, Struck by moving equipment	ЗH		2M

			 Conduct a thorough pre-operational inspection of the roller and compactor equipment to identify any potential hazards or issues that may have arisen since the last use. Ensure that all workers operating and engagin with the roller and compactor equipment have completed mandatory traisets programs regarding the safe operation and basic maintenance of this specific type of machinery. Implement a regular preventive maintenance use due for the roller and compactor equipment, including routine abecks on critical pressuch as be neulic systems, brakes, tires, and engine comments. Place warning signed insafety thriers around the backing area to alert workers and prevent unaneorise on the set of the roller and compactor equipment is using operate. Establish efforce comprised to the set of the roller and compactor equipment is the set of the regulation of the set of the roller and compactor equipment is use on visconal Protective Equipment (PPE) for workers in proximity to the roler and compactor equipment of the roler and compactor equipment obstructions or uneven surfaces. Adverse operating procedures by restricting the roller and compactor equipment operators and group of the defensive driving techniques when operating locations where there obstructions or uneven surfaces. Adverse operating procedures by restricting the roller and compactor equipment operations or uneven surfaces. Fractice defensive driving techniques when operating the roller and compactor equipment, ensuring that they are free from hazards and able to bear the weight of the heavy machinery. Continuously assess weather conditions and visibility, adjusting work schedules and safety measures accordingly to minimise the risk of accidents caused by inclement weather or limited visibility. Assign a competent supervisor to monitor the roller and compactor equipment's operation, oversee adherence to safety protocols during work, and assist in addressing any potential h

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAF WC A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to review the sure it remains revised if necessary) if relevant control measure are a conconsultation with workers (including contractors are subcontract of the SWMS and their health and safety representatives who re workplace.

ke sure it remains effective and must be reviewed (and acception of the process should be carried out in s any subcontract s) who may be affected by the operation esentatives who recented that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWN			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting sections.			
Responsible person is assigned and listed on the SWMS for the imement of cont, measures.			
Permit requirements specified, such as Hot Wey, Electrical Work, Verat Heights etc.			
SWMS identifies plant and equipment to be up t.			
Details of inspection checks required for any equipment listed approved on the SWMS.			
Describes any mandatory qualifications, experience vaining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
