THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE POST THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (r 3U) is	required to turn at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE BI PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with agislative requirements to first identify any site hazards, conditions unical those hazards and then to further take steps to either the conditions are or conditions.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Select me appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Poor housekeeping, Inadequate supervision	2M	- Housekeeping procedures: Implement regular cleaning and organisation schedules to maintain a clutter-free work environment, reducing the risk of accidents caused by poor housekeeping.  - Designated waste disposal areas: Set demanted areas for proper waste disposal, including clearly marked bins for recyclables chazardour staterials, and general waste.  - Toolbox talks and safety briefings: Conduct reginar toolbox talks and safety briefings to emphasise the interaction of maintain and clear and organised workspace, as well as reinforcing proper practices from place health and safety.  - Supervisory training: Eris a supervisors are addituately trained to monitor employees' an affected to suffer a supervisor and take corrective actives when near sary.  - Continuition to a sub Establish clear communication channels between worked in management, encouraging personnel to report unsafe conditions or potent in hourds proofly.  - Safety igna a Instant sible safety signs throughout the worksite, highlighting another safety, formation and reminders related to housekeeping, electrical hands, ip and a phazards, etc.  - Personar rotective Equipment (PPE): Enforce the use of appropriate PPE, such gloves, safety glasses, and high visibility vests, based on the specific tasks being partimed and potential hazards present.  - Risk assessments: Carry out regular risk assessments to identify potential hazards and implement control measures to mitigate these risks.  - Periodic inspections: Schedule periodic workplace inspections to ensure that housekeeping standards are consistently maintained and that any issues are addressed in a timely manner.  - Tools and equipment storage: Allocate sufficient space for proper storage of tools and equipment when not in use, contributing to a more organised work environment and reducing the risk of accidents.  - Training and awareness: Provide ongoing training for employees on workplace health and safety topics, focusing on the importance of good housekeeping, hazard recognition, and reporting	1L	
2. Machinery Inspection	Faulty equipment, Improper use	3H	- Perform regular and thorough inspections of the machinery before and after each use, checking for any visible issues or damage to the equipment.	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Ensure that all operators have received proper training and are competent in the safe operation of the scraper to prevent accidents caused by improper use.		
			- Implement a robust preventative maintenance set sude, including regular servicing and repairs, to minimise the risk of faulty equipment causing accidents.		
			- Display clear safety signage on and aroung the scraper ghlighting potential hazards associated with the machinery and clining scalines for safe usage.		
			<ul> <li>Provide Personal Protective Equipment (PPE) in as safety classes, gloves, and high-visibility vests to be work by all personnel we high in classification proximity to the scraper.</li> <li>Develop an emerginary poons plan for situations involving faulty equipment or improper uses a purificial transfer and all states of the provided provided in the provided prov</li></ul>		
			workers are a filiar with the procedule to w.  - Use a kout/tall ut produces when conying out maintenance or repair work on the solution which proves disabling the machinery and putting up appropriate warnings to prove the unauthorised use.		
			- Estable have ar concentration system between machine operators and other team members coordinate tasks safely and efficiently, reducing the chance of nicative leading to improper use or accidents.		
			Strict corce guidelines that prohibit the use of mobile phones, headphones, or her distractions while operating the scraper, so that operators can remain entirely used on their task and control the machine properly.		
			Set specific boundaries and exclusion zones around the scraper when in use, preventing unauthorised personnel from entering potentially hazardous areas.		
			- Equip the scraper with advanced safety features like built-in sensors, alarms, and override systems to help minimise the risk of accidents resulting from faulty equipment or improper use.		
			- Conduct regular safety audits on the worksite, identifying any potential hazards connected with the scraper operations and devising strategies to address them effectively.		
			- Foster a strong safety culture within the workplace, encouraging all employees to take responsibility for their own safety and that of others, actively reporting any hazards or concerns related to the scraper to their supervisor.		
3. Site Setup	Tripping hazards, Poor lighting	2M	- Conduct a pre-work risk assessment of the site to identify any existing tripping hazards, such as uneven surfaces, protruding objects or materials scattered around the area.	1L	
			- Remove or minimise the identified tripping hazards, by clearing debris and obstacles, leveling or marking uneven surfaces, and maintaining pathways clear of obstructions.		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Ensure appropriate lighting is installed in working areas, taking into account time of day, visibility factors, and weather conditions. Consider using additional portable lights, floodlights, or headlamps as necessary to main well-lit spaces.		
			- Regularly inspect the work site throughout the logical to maintain clear pathways and check for new potential hazards. Monitor beasonal changes or environmental factors that may impact the lighting condition or creater of obstacles.		
			- Implement clear signage and barricades arou ansite areas, particularly where hazards cannot be removed, and outline designation walkways to be used by workers in order to avoid accounts.		
			- Equip workers with the partie personal protective equipment (PPE), such as hi-vis clothing or footwar with suresist it soles, to refluce the risk of injury from tripping hazards and a prove over a visibility in-site.		
			- Develop and colement safe work a dure detailing the proper usage of equit and to so mg site setup, including securing cables and hoses to avoid creating hazar		
			- Cond to the lar too x talks and safety briefings with staff to communicate the importance on aintain a clean and well-organised work environment to prevent inping a zards and accidents due to poor lighting.		
	7		- So, but tasks requiring greater visibility and precision during daylight hours when ossible make use of natural light and reduce reliance on artificial lighting terms.		
			- E. courage workers to report any near misses, accidents or newly identified nazards to supervisors immediately, to facilitate prompt action and ensure the ongoing safety of staff.		
			- Train workers to identify potential hazards and maintain vigilance in recognizing environmental and situational cues that may require adjustments to worksite lighting levels or the management of tripping hazards.		
			- Continuously review and refine site setup strategies, risk assessments, and implemented control measures to account for changes in working conditions or new information, ensuring the ongoing protection of workers against the potential risks of tripping hazards and poor lighting.

### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting so tions.			
Responsible person is assigned and listed on the SWMS for the imperent of continue assures.			
Permit requirements specified, such as Hot Work, Veralt Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed are noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
dentifies any hazardous substances used with specific control measures in line with any SDS.
