**TASK OR ACTIVITY: Scroll Saw**

Business Name: [Company Name]	ABN: [ABN]	SWMS#
Business Address: [Company Address]		
Contact Person:	Phone: [Phone]	Email:

**THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PROJECT MANAGER OF THE PROJECT**

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:

Signature: \_\_\_\_\_ Title: \_\_\_\_\_ Date: \_\_\_\_\_

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, as well as reviews and modifications of the SWMS.

Full Name: \_\_\_\_\_ Title: \_\_\_\_\_ Phone: \_\_\_\_\_

**ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED**

**NAME AND DATED SIGNATURE OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS**

	NAME	SIGNATURE	DATE
Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, to conduct and communicate those hazards and then to further take steps to either eliminate or control each hazard.			
If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.			

**CLIENT OR PRINCIPAL CONTRACTOR DETAILS**

**ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT**

<input type="checkbox"/> involves a risk of a person falling more than 2 meters.	<input type="checkbox"/> is carried out on or near pressurised gas mains or piping.
<input type="checkbox"/> is carried out on a telecommunication tower.	<input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines.
<input type="checkbox"/> involves demolition of an element of a structure that is load-bearing.	<input type="checkbox"/> is carried out on or near energised electrical installations or services.
<input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure.	<input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere.
<input type="checkbox"/> involves, or is likely to involve, disturbing asbestos.	<input type="checkbox"/> involves tilt-up or precast concrete.
<input type="checkbox"/> involves structural alteration or repair that requires temporary support to prevent collapse.	<input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor.
<input type="checkbox"/> is carried out in or near a confined space.	<input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant.
<input type="checkbox"/> is carried out in/near a shaft or trench deeper than 1.5m or tunnel involving use of explosives.	<input type="checkbox"/> is carried out in areas with artificial extremes of temperature.
<input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning.	<input type="checkbox"/> involves diving work.

**ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY**

<input type="checkbox"/> Forklift	<input type="checkbox"/> Crane/s	<input type="checkbox"/> Hoist/s	<input type="checkbox"/> Excavator	<input type="checkbox"/> Backhoe/Loader	<input type="checkbox"/> Boom Lift	<input type="checkbox"/> EWP	<input type="checkbox"/> Genie Lift
<input type="checkbox"/> Trencher	<input type="checkbox"/> Drilling Rig	<input type="checkbox"/> Trucks	<input type="checkbox"/> Formwork	<input type="checkbox"/> Bobcat	<input type="checkbox"/> Flammable Gas	<input type="checkbox"/> Fuel	<input type="checkbox"/> Dozer
<input type="checkbox"/> High Voltage	<input type="checkbox"/> Mulcher	<input type="checkbox"/> Tilt-up Panels	<input type="checkbox"/> Roller	<input type="checkbox"/> Scissor Lift	<input type="checkbox"/> Tractor	<input type="checkbox"/> Other -	

**RISK MATRIX**

LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			<b>Elimination</b> Remove the hazard.
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	<b>Substitution</b> Replace the hazard.
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	<b>Isolation</b> Isolate People from the hazard
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	<b>Engineering</b> Isolate the hazard.
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records	<b>Administrative</b> Change the work. <b>PPE</b>

**Notes on Hierarchy of Controls:** Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.

**PERSONAL PROTECTIVE EQUIPMENT (PPE)**

FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EYE/FACE PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

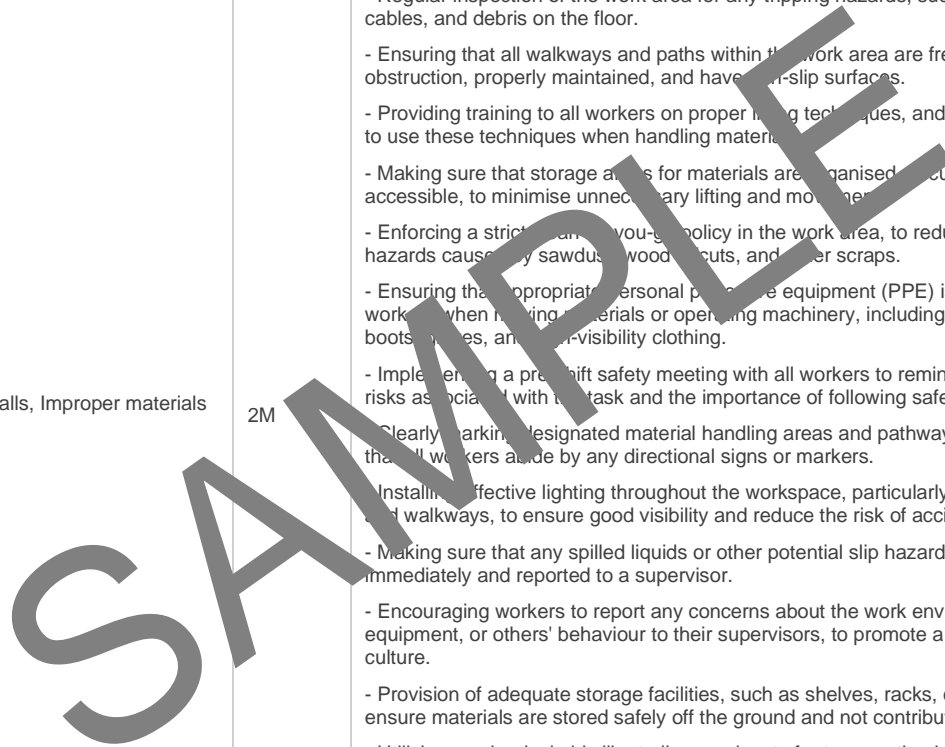

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS; and,
3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips, trips and falls, Improper materials handling	2M	<ul style="list-style-type: none"> <li>- Regular inspection of the work area for any tripping hazards, such as loose cords, cables, and debris on the floor.</li> <li>- Ensuring that all walkways and paths within the work area are free from obstruction, properly maintained, and have anti-slip surfaces.</li> <li>- Providing training to all workers on proper lifting techniques, and encouraging them to use these techniques when handling materials.</li> <li>- Making sure that storage areas for materials are organised, secure, and easily accessible, to minimise unnecessary lifting and movement.</li> <li>- Enforcing a strict no-you-go policy in the work area, to reduce slip and trip hazards caused by sawdust, wood scraps, and other scraps.</li> <li>- Ensuring that appropriate personal protective equipment (PPE) is worn by all workers when handling materials or operating machinery, including steel-capped boots, gloves, and high-visibility clothing.</li> <li>- Implementing a pre-shift safety meeting with all workers to remind them of potential risks associated with the task and the importance of following safe work procedures.</li> <li>- Clearly marking designated material handling areas and pathways, and ensuring that all workers abide by any directional signs or markers.</li> <li>- Installing effective lighting throughout the workspace, particularly near equipment and walkways, to ensure good visibility and reduce the risk of accidents.</li> <li>- Making sure that any spilled liquids or other potential slip hazards are cleaned up immediately and reported to a supervisor.</li> <li>- Encouraging workers to report any concerns about the work environment, equipment, or others' behaviour to their supervisors, to promote a proactive safety culture.</li> <li>- Provision of adequate storage facilities, such as shelves, racks, or pallets, to ensure materials are stored safely off the ground and not contributing to trip hazards.</li> <li>- Utilising mechanical aids like trolleys and carts for transporting heavy or bulky materials, reducing the risk of manual handling injuries.</li> <li>- Periodically reviewing and updating the Safe Work Method Statements (SWMS) to ensure they are current, relevant and effectively controlling potential hazards in the workplace.</li> </ul>	1L	
2. Inspect Equipment	Electrical hazards, Moving parts	2M	<ul style="list-style-type: none"> <li>- Regular equipment inspection and maintenance: Ensure that the scroll saw is routinely inspected for any signs of wear, damage, or malfunctions. This should be performed by a qualified technician according to the manufacturer's recommended schedule.</li> <li>- Safe electrical connections: Double-check that all electrical connections are secure, grounded, and free from any exposed wires or potential sources of short-circuiting.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Power supply isolation: Utilise a Residual Current Device (RCD) to provide an additional layer of protection against electrical hazards by automatically disconnecting power if an imbalance is detected.</li> <li>- Use of appropriate Personal Protective Equipment (PPE): Require workers to wear safety gloves, eye protection, and hearing protection when operating the scroll saw.</li> <li>- Training and skill development: Ensure that all operators have adequate knowledge and expertise in using the scroll saw, as well as understanding the associated risks and control measures.</li> <li>- Safe work procedures: Implement and enforce a set of standardised work procedures for utilising the scroll saw safely and efficiently.</li> <li>- Emergency stop mechanisms: Ensure that the scroll saw is equipped with a clearly labeled emergency stop button or switch, which can be easily accessed in case of an incident.</li> <li>- Proper workstation set-up: Position the scroll saw on a sturdy and level surface to reduce the risk of vibration, misalignment, and accidental movement during operation.</li> <li>- Guarding moving parts: Ensure that all moving parts of the scroll saw, such as blades and belts, have adequate guarding in place to prevent accidental contact with the operator.</li> <li>- Blade changes and adjustments: Educate users on how to safely change and adjust the scroll saw blade, including isolating power supply prior to changes to prevent unexpected equipment start-up.</li> <li>- Good housekeeping practices: Maintain a clean and tidy work area, minimising clutter, trip hazards, and the build-up of combustible dust around the scroll saw.</li> <li>- Appropriate signage: Display clear and readable warning signs around the scroll saw workplace, highlighting potential hazards and reminding workers of necessary control measures.</li> <li>- Incident reporting and investigation: Implement a system for reporting near misses, accidents, and injuries involving the scroll saw to foster continuous improvement and reduce future risks.</li> </ul>		
3. Install Blade	Blade breakage, Cuts from sharp edges	2M	<ul style="list-style-type: none"> <li>- Proper training: Ensure all operators are adequately trained in safe handling and installation of blades, as well as identifying signs of blade wear and defects.</li> <li>- Personal protective equipment (PPE): Operators should wear appropriate PPE, such as cut-resistant gloves, safety goggles, and long sleeves, to protect against cuts and flying debris.</li> <li>- Regular maintenance and inspection: Perform periodic checks on the scroll saw and its components, including the blade, to ensure they are in good working order and free from defects.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Use correct blade type and size: Always follow the manufacturer's recommendations for selecting the appropriate blade for the specific material being cut, ensuring it is suitable for the task at hand.</li> <li>- Proper blade storage: Store unused blades in a secure and dry location, away from moisture and direct sunlight, to prevent damage and corrosion.</li> <li>- Blade installation technique: Follow the manufacturer's instructions for installing the blade, ensuring it is properly clamped, tightened, and aligned.</li> <li>- Stability of workstation: Ensure that the scroll saw is securely mounted on a stable workstation, reducing the risk of accidents during operation.</li> <li>- Gradual tensioning: When installing the blade, apply even tension while tightening, avoiding abrupt movements or excessive force that could lead to breakage.</li> <li>- Safe blade disposal: Dispose of used or damaged blades in a designated sharps container to minimize the risk of injury to others.</li> <li>- Clear workspace: Keep the area around the scroll saw clear of clutter and hazards that could cause tripping or other accidents while working with the tool.</li> <li>- Unplug the scroll saw when not in use or during blade change: This reduces the risk of unintentional activation, which may result in injury from contacting the moving blade.</li> <li>- Emergency stop button: Ensure that the scroll saw is equipped with an accessible emergency stop button that can be easily activated in case of unexpected issues or hazards.</li> <li>- Incident reporting and response: Encourage prompt reporting of any incidents or near misses related to blade breakage or cuts in the workplace, enabling swift action to rectify any safety concerns and prevent future occurrences.</li> </ul>

**SIGNATORIES OF THE SAFE WORK METHOD STATEMENT**

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

**SAFE WORK METHOD STATEMENT MONITORING AND REVIEW**

**The SWMS must be reviewed regularly** to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are needed. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

**The SWMS must be monitored regularly** for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

**SAFE WORK METHOD STATEMENT REVIEW CHECKLIST**

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.	<input type="checkbox"/>	<input type="checkbox"/>	
Names and signatures of all relevant personnel consulted during the development of the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Specific personnel and qualifications, experience is noted in the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Provides a step-by-step process of tasks required to carry out the activity or task.	<input type="checkbox"/>	<input type="checkbox"/>	
Adequate risk assessment of any identified hazards has been completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Foreseeable hazards are identified and documented for each step.	<input type="checkbox"/>	<input type="checkbox"/>	
Any hazards listed in any site risk assessments have been added to the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Check control measures added to the SWMS are the most effective solutions.	<input type="checkbox"/>	<input type="checkbox"/>	
Responsible person is assigned and listed on the SWMS for the implementation of control measures.	<input type="checkbox"/>	<input type="checkbox"/>	
Permit requirements specified, such as Hot Work, Electrical Work, Work at Heights etc.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS identifies plant and equipment to be used.	<input type="checkbox"/>	<input type="checkbox"/>	
Details of inspection checks required for any equipment listed are noted on the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Describes any mandatory qualifications, experience, training, skills required to perform the work.	<input type="checkbox"/>	<input type="checkbox"/>	
Applicable personal protective equipment is selected on the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Lists any required permits or licenses.	<input type="checkbox"/>	<input type="checkbox"/>	
Reflects and documents any legislative references and/or Australian Standards.	<input type="checkbox"/>	<input type="checkbox"/>	
Identifies any hazardous substances used with specific control measures in line with any SDS.	<input type="checkbox"/>	<input type="checkbox"/>
