

Skirting And Architrave   SAFE WORK METHOD STATEMENT (SWMS)									
TASK	OR ACTIVITY: Skirting And Arcl	hitrave							
Business Name: [Company Name]		ABN: [ABN]	SWMS#						
Business Address: [Company Address]									
Contact Person:	Phone: [Phone]	E gil:							
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE P OF THE PROJECT							
Under the Work Health and Safety Regulation (WHS Regulation), a person conducte proposed work starts.	cting a business or undertaking (H BU) is	required to ture at a safe work method s	statement (SWMS) is prepared before						
Full Name:									
Signature:		Title:	Date:						
Details of the person(s) responsible for ensuring implementation, monitoring	compliance of the SWMS well as review	vs and modifications of the SWMS.							
Full Name:		Title:	Phone:						
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE B OPMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND						
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditioned unical those hazards and then to further take steps to either condition of the ear hazard.	NAME	SIGNATURE	DATE						
If an incident or a near miss occurs, all work must study unately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.									
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.									
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips, trips and falls, Exposure to hazardous substances	2М	<ul> <li>Conduct a thorough risk assessment and site inspection before commencing work to identify potential hazards such as uneven surface ubstacles, and hazardous substances.</li> <li>Keep the work area clean and free from druns, ensuring any obstacles that could cause slips, trips, or falls are removed or clearly market.</li> <li>Ensure workers wear appropriate personal proper equipment (PPE), including non-slip footwear, to minimise the risk of slips an utils.</li> <li>Train workers on how to properly handle and store azz nods substances in accordance with many parer's a tructions and releare safety regulations, and provide Material or ety Dan Shee (MSDS) for inference.</li> <li>Store hazar to substances, such a data set of fire, fumes, or spills.</li> <li>Use market or oropholic leaning up any accidental spills when handling hazardous substances in place in the work area, so that workers can clearly see any other hazars and avoid accidents.</li> <li>Instance and the budy system where workers check in with one another to promote aware, using and accountability when working with hazardous substances and around ateriates.</li> <li>Implement a system for regular inspections and maintenance of tools and equipment, ensuring any malfunctions are promptly reported and repaired to prevent accidents caused by faulty equipment.</li> <li>Encourage workers to report any hazards they identify and actively involve them in the ongoing improvement of workplace health and safety through regular toolbox talks, training sessions, and open communication channels.</li> </ul>	1L	
2. Measuring and marking	Sharp tools, incorrect measurements leading to material waste	2M	<ul> <li>Proper Training: Ensure that all workers involved in the measuring and marking process are adequately trained in using sharp tools, taking accurate measurements, and understanding the significance of skirting and architrave dimensions.</li> <li>Protective Equipment: Provide appropriate personal protective equipment (PPE), such as gloves and safety glasses, to minimise the risk of injury while handling sharp tools during the measuring and marking process.</li> <li>Clear Workspace: Maintain a clutter-free workspace where measuring and marking are conducted to reduce the risk of accidents and distractions that could lead to incorrect measurements and material waste.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul> <li>Tool Maintenance: Regularly maintain and inspect sharp tools used for measuring and marking, ensuring that they remain in proper working condition, preventing inaccurate measurements or injury to workers.</li> <li>Measurement Verification: Encourage workers of double-check their measurements and markings before proceeding with cuts thus reducing the chance for material wastage due to incorrect measurements.</li> <li>Use of Appropriate Measuring Tools: Employ of the measuring tools, such as tape measures, marking gaures, and speed squars, to facilitate accurate measurements and precise in kings without any objuit</li> <li>Standard Operation of the uring of marking tarks, providing clear guidelines for workers to ensure that consider to comes an uchieved, minimising inaccuracies and material viste.</li> <li>Profer Communication: Foster a work environment that encourages open common to tion and gream members, allowing them to seek clarification on measuring is and orkings if needed. This will help prevent mistakes and improve overall tocket.</li> <li>Demontration and Process Reviews: Conduct regular demonstrations and process in the use stallation.</li> <li>Ougquate Lighting: Ensure sufficient lighting is available in the workplace to enable workers to carry out accurate measurements and marking, especially for complex or repetitive tasks, significantly reducing the likelihood of errors.</li> <li>Waste Reduction Incentives: Encourage waste reduction incentives by recognizing and rewarding workers who consistently produce accurate measurements and markings, which will promote the active adoption of best practices and contribute to minimising material waste in skirting and architrave projects.</li> </ul>		
3. Cutting	Machinery hazards, noise pollution, dust particles	ЗН	<ul> <li>Regular machinery maintenance: Ensure all cutting equipment is checked and maintained regularly to minimise the risk of injury due to malfunctioning or damaged parts.</li> <li>Proper safety training: Provide comprehensive educational sessions for workers about the correct handling, operation, and storage techniques for utilising the machinery related to skirting and architrave cutting tasks.</li> <li>Personal Protective Equipment (PPE): Mandate wearing appropriate PPE, including safety goggles, gloves, earplugs or earmuffs, and dust masks to protect workers from noise pollution and harmful dust particles produced during the cutting process.</li> </ul>	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Exhaust ventilation and dust extraction systems: Install and maintain effective ventilation and dust collection methods at the workplace to reduce the volume of dust particles in the air and regulate temperature.		
			- Implement safe work procedures: Develop an collow Standard Operating Procedures (SOPs) to ensure a consistent coung process that minimises the risk of accidents and optimizes productivity.		
			- Utilise safety guards on machinery: Always k to are the guards, fences, or barriers in place during machine operation to minimise contact between barkers and the moving parts of the machine.		
			- Noise abatement to the test is below soundproof modulas, isolation booths, or acoustic enclosure for modules. Litting high levels of noise to reduce noise pollution factory workers.		
			- Machine operation supervision: Main, a well-organised supervision plan where trained d com, have apervisors assess workers' adherence to control measures and a supervision any pointial hazards actively.		
			- Emery no, repare, ass protocols: Establish clear-cut emergency response procedues caloring to achinery-related accidents, noise-induced hearing damage, ad resp. atory or use stemming from dust particles.		
			- En trace worker awareness and communication: Cultivate a culture of open lialogue, the worksite, where employees are encouraged to report any potential zards they identify, seek clarification if uncertain, and share ideas for safety incovement measures.

#### **EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES**

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

#### SAL WO A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to review the sure it remains revised if necessary) if relevant control measure are a conconsultation with workers (including contractors are subcontract of the SWMS and their health and safety representatives who re workplace.

ke sure it remains effective and must be reviewed (and area of the process should be carried out in s and subcontract s) who may be affected by the operation esentatives who received that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

#### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWN			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting sections.			
Responsible person is assigned and listed on the SWMS for the imement of cont, measures.			
Permit requirements specified, such as Hot Wey, Electrical Work, Verat Heights etc.			
SWMS identifies plant and equipment to be up t.			
Details of inspection checks required for any equipment listed approved on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
