

**Smoke Alarms | SAFE WORK METHOD STATEMENT (SWMS)**

**TASK OR ACTIVITY: Smoke Alarms**

Business Name: [Company Name]	ABN: [ABN]	SWMS#
-------------------------------	------------	-------

Business Address: [Company Address]

Contact Person:	Phone: [Phone]	Email:
-----------------	----------------	--------

**THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT**

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:

Signature:	Title:	Date:
------------	--------	-------

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, as well as reviews and modifications of the SWMS.

Full Name:	Title:	Phone:
------------	--------	--------

**ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED** | **NAME AND DATED SIGNATURE OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS**

	NAME	SIGNATURE	DATE
Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, conditions and then to communicate those hazards and then to further take steps to either eliminate or control each hazard.			
If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.			

**CLIENT OR PRINCIPAL CONTRACTOR DETAILS**

Client:	SCOPE OF WORKS Provide a detailed description of the specific work being carried out (otherwise known as scope of works).
Project Name:	
Project Address:	
Project Manager:	
Contact Phone:	
Project Manager Signature:	
Date SWMS supplied to Project Manager:	

**ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT**

<input type="checkbox"/> involves a risk of a person falling more than 2 meters.	<input type="checkbox"/> is carried out on or near pressurised gas mains or piping.
<input type="checkbox"/> is carried out on a telecommunication tower.	<input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines.
<input type="checkbox"/> involves demolition of an element of a structure that is load-bearing.	<input type="checkbox"/> is carried out on or near energised electrical installations or services.
<input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure.	<input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere.
<input type="checkbox"/> involves, or is likely to involve, disturbing asbestos.	<input type="checkbox"/> involves tilt-up or precast concrete.
<input type="checkbox"/> involves structural alteration or repair that requires temporary support to prevent collapse.	<input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor.
<input type="checkbox"/> is carried out in or near a confined space.	<input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant.
<input type="checkbox"/> is carried out in/near a shaft or trench deeper than 1.5m or tunnel involving use of explosives.	<input type="checkbox"/> is carried out in areas with artificial extremes of temperature.
<input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning.	<input type="checkbox"/> involves diving work.

**ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY**

<input type="checkbox"/> Forklift	<input type="checkbox"/> Crane/s	<input type="checkbox"/> Hoist/s	<input type="checkbox"/> Excavator	<input type="checkbox"/> Backhoe/Loader	<input type="checkbox"/> Boom Lift	<input type="checkbox"/> EWP	<input type="checkbox"/> Genie Lift
<input type="checkbox"/> Trencher	<input type="checkbox"/> Drilling Rig	<input type="checkbox"/> Trucks	<input type="checkbox"/> Formwork	<input type="checkbox"/> Bobcat	<input type="checkbox"/> Flammable Gas	<input type="checkbox"/> Fuel	<input type="checkbox"/> Dozer
<input type="checkbox"/> High Voltage	<input type="checkbox"/> Mulcher	<input type="checkbox"/> Tilt-up Panels	<input type="checkbox"/> Roller	<input type="checkbox"/> Scissor Lift	<input type="checkbox"/> Tractor	<input type="checkbox"/> Other -	

**RISK MATRIX**

LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			<b>Elimination</b> Remove the hazard.
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	<b>Substitution</b> Replace the hazard.
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	<b>Isolation</b> Isolate People from the hazard
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	<b>Engineering</b> Isolate the hazard.
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records	<b>Administrative</b> Change the work. <b>PPE</b>

**Notes on Hierarchy of Controls:** Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.

**PERSONAL PROTECTIVE EQUIPMENT (PPE)**

FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EYE PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS; and,
3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Electric shock, Falling from height	3H	<ul style="list-style-type: none"> <li>- Provide proper training to workers involved in the installation and maintenance of smoke alarms, focusing on risks associated with electrical components and working at heights.</li> <li>- Ensure that all workers wear appropriate personal protective equipment (PPE), including insulated gloves, safety harnesses and fall arrest systems when necessary.</li> <li>- Utilise a lockout/tagout system for electrical circuits to prevent unexpected energization while servicing smoke alarms.</li> <li>- Implement a buddy system where two workers observe and assist each other during the installation and maintenance tasks, reducing the risk of accidents.</li> <li>- Schedule regular site inspections and audits to ensure compliance with workplace health and safety regulations and rectify any identified issues or hazards promptly.</li> <li>- Establish clear communication protocols between workers and supervisors regarding potential hazards and changes in work activities to maintain situational awareness.</li> <li>- Use safe lifting and working techniques like using ladders, scaffolding, or aerial lifts to reduce the risk of injury from falling while working at heights.</li> <li>- Install warning signs and barriers around the working area to alert others about the potential electrocution hazard and the need for maintaining a safe distance.</li> <li>- Develop an emergency response plan outlining the steps to be taken in case of an accident, such as electric shock or fall from height, including first aid measures and reporting procedures.</li> <li>- Conduct ongoing risk assessments and implement additional control measures as required to maintain a safe working environment during the preparation and execution of smoke alarm installation or maintenance tasks.</li> </ul>	2M	
2. Smoke Alarm Inspection	Eye irritation, Noise exposure	2M	<ul style="list-style-type: none"> <li>- Provide proper training to the workers on the correct inspection methods and hazard identification during smoke alarm inspections.</li> <li>- Use proper personal protective equipment (PPE), such as safety goggles, to protect against eye irritation from dust or debris during the inspection process.</li> <li>- Adopt a step-by-step inspection process that minimises unnecessary handling of the smoke alarm components, reducing the risk of eye irritation due to contact with allergens or irritants.</li> <li>- Ensure the work environment is well-ventilated to reduce the risk of respiratory irritation from airborne particles during the inspection process.</li> <li>- Implement regular breaks for workers during the inspection process to minimise the continuous exposure to noise generated by the smoke alarms when activated.</li> <li>- Provide workers with suitable hearing protection, such as earplugs or earmuffs, to minimise potential noise exposure during smoke alarm testing and inspection.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Set up designated quiet zones or rest areas where workers can take temporary respite from the noise exposure, ensuring they maintain their physical and mental wellbeing during the job.</li> <li>- Encourage workers to report any signs of discomfort or potential health concerns immediately, such as eye irritation or difficulty hearing, so appropriate action can be taken without delay.</li> <li>- Establish a system for regular maintenance and cleaning of inspection tools and equipment to minimise hazards and ensure their efficient functioning.</li> <li>- Create a clear communication protocol for workers during the inspection process using hand signals or other non-verbal cues to minimise excessive noise exposure and misunderstanding.</li> <li>- Regularly review and update workplace policies, procedures, and guidelines on smoke alarm inspection practices to keep workers informed about the latest industry standards and best practices.</li> <li>- Perform routine risk assessments for the entire workplace, including the smoke alarm inspection work step, to identify potential hazards that may arise or change over time.</li> <li>- Foster a positive safety culture within the organisation by encouraging open dialogue and active participation in safety meetings, ensuring workers feel comfortable discussing any concerns they might have regarding their tasks and the associated hazards.</li> </ul>		
3. Ladder Set-up	Falling from height, Ladder collapse	3H	<ul style="list-style-type: none"> <li>- All employees involved in the ladder setup and use must complete ladder safety training and be competent in the safe handling of ladders.</li> <li>- Ensure that ladders provided for the job are compliant with the appropriate Australian standards and manufactured specifically for the task at hand - either for light-duty domestic activities or heavy-duty industrial tasks.</li> <li>- Inspect each ladder before use to detect any defects, damage, or loose parts and replace faulty ladders or carry out repairs as necessary by a trained professional.</li> <li>- Ladders should always be set up on a level, stable, and well-drained surface to prevent movement during use. Where necessary, use ladder stabilizers, anti-slip mats, or outrigger devices for added support and stability.</li> <li>- Employees must maintain three points of contact while ascending and descending the ladder - this means keeping one hand and two feet (or two hands and one foot) on the ladder at all times.</li> <li>- The top two steps and the very bottom step of the ladder should not be used for standing or working on, so as to maintain adequate stability and prevent falls from height.</li> <li>- Ensure proper angle when setting up an extension ladder: usage of the '1 in 4' rule, where the ladder base should be placed one meter away from the vertical plane of support for every four meters of ladder length.</li> </ul>	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Implement buddy system where possible, having one worker hold onto the ladder base to keep it stable while another climbs, ensuring an additional level of security.</li> <li>- Provide personal fall protection equipment, such as safety harnesses and lanyards, for employees working at heights higher than 2 meters, and train them in their appropriate use.</li> <li>- Regularly review safety procedures and control measures to ensure their continued effectiveness in minimising the risk of accidents and injuries related to ladder set-up and use. Encourage employees to communicate any concerns or suggestions for improvement to workplace health and safety officer.</li> </ul>

**SIGNATORIES OF THE SAFE WORK METHOD STATEMENT**

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

**SAFE WORK METHOD STATEMENT MONITORING AND REVIEW**

**The SWMS must be reviewed regularly** to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are needed. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

**The SWMS must be monitored regularly** for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

**SAFE WORK METHOD STATEMENT REVIEW CHECKLIST**

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.
