SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Poor work area conditions, Inadequate training	2М	<ul> <li>Regularly inspect the work area to identify any potential hazards, such as uneven surfaces or congested spaces.</li> <li>Implement a clear and systematic housekeen programme to maintain cleanliness of the work area and prevent a clear to workers can clearly see any potential hazards and carry out their tasks intra difficulty.</li> <li>Ensure adequate lighting is provided in their rk are to workers can clearly see any potential hazards and carry out their tasks intra difficulty.</li> <li>Provide proper personal protective equipment (NC) to all convoyees, including high-visibility clothing, safety to wear, and gloves, incremed.</li> <li>Clearly mark hazer couct eas, such as loading zone, to make it easy for workers to identify potential darger.</li> <li>Establish an inforce bacters or exclusioncones around the tailgate loader to keep nutthorns to personal and orientation programs covering the use of tailgate loader to sugare after proceeding and hazard identification for all workers who are expecten to opulate or work near the equipment.</li> <li>Displop, mentioning system that pairs experienced employees with new hires for on-the thruidance and support.</li> <li>Onduct routine equipment inspections to ensure that all components of the tait to loader are in good working order and that any necessary repairs or maintenance are conducted promptly.</li> <li>Create an accessible emergency response plan that includes procedures for incidents, such as injuries and accidents, fires, or equipment malfunctions.</li> <li>Encourage open communication among workers, encouraging them to report any potential hazards or concerns promptly so they can be addressed before an incident occurs.</li> <li>Maintain accurate records of employee training, certifications, and competencies to ensure all workers maintain the required skills and knowledge to safely carry out their tasks.</li> <li>Regularly assess the effectiveness of control measures through monitoring and review, and revise as necessary to improve workplace health an</li></ul>	1L	
2. Equipment inspection	Damaged tailgate, Inoperable safety features	ЗH	- Conduct a thorough visual inspection of the tailgate loader to check for any signs of damage, cracks, bending, or other deformations that may compromise its structural integrity.	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Ensure that all moving parts of the tailgate loader are well-lubricated to prevent jams or malfunctions during operation.		
			- Test the proper functioning of safety features such as sensors, limit switches, emergency stop buttons, and warning lights betwee commencing work.		
			- Verify that hydraulic hoses are in good countion, free of taks or damage, and securely fastened to maintain safe pressure to taks.		
			- Provide regular maintenance and servicing of tailgate loade according to the manufacturer's recommendations to ensure optime performance and safety.		
			- Implement a systematic equipernt inspection rout, and auding pre- and post-work checks, to identify and post provide hazards in a unely manner.		
			- Clearly maximum and label an elamage or inormalies afety features and keep records of the suntil they be repaired or chaced.		
			- Kee invent of pare parts on hand to facilitate quick repairs and replace in this of during the components.		
			- Assign only ained, mpetent personnel to operate and inspect the tailgate loader, a surf, they are familiar with the safety features and correct working needul s.		
	1		- Enc. ra e open communication among workers, encouraging them to report any oncerns defects relating to the tailgate loader's safety features or performance.		
			- tablish clear guidelines for responding to incidents involving a malfunctioning or damaged tailgate loader, outlining emergency procedures, incident reporting, and follow-up actions.		
	5		<ul> <li>Provide appropriate personal protective equipment (PPE) for workers involved in the inspection, operation, and maintenance of the tailgate loader, including safety gloves, safety glasses, and high visibility vests.</li> </ul>		
			<ul> <li>Put in place physical barriers, cones, or caution tape to protect workers and bystanders from the immediate vicinity of the tailgate loader when it is in use, especially if there are known defects.</li> </ul>		
			- Periodically review and update the Safe Work Method Statement (SWMS) for equipment inspection and operation, incorporating improvements in industry best practices, manufacturer updates, and feedback from workers in the field.		
			<ul> <li>Provide comprehensive training to all staff members on proper lifting techniques and safe operation of the tailgate loader to prevent potential injuries and accidents.</li> </ul>		
3. Loading cargo	Falling cargo, Inappropriate lifting techniques	3H	<ul> <li>Implement strict pre-loading inspections to ensure cargo is secured correctly, weight is evenly distributed, and no items are at risk of falling during the loading process.</li> </ul>	1L	
			- Display clear signage around the loading area to warn bystanders of potential hazards such as falling objects or moving equipment.		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Equip workers with appropriate personal protective equipment (PPE), including high-visibility vests, hard hats, and steel-toed boots, to minimise injury risks from falling cargo.		
			- Establish a designated exclusion zone aroups us tailgate loader during operation to restrict access to authorised personnel contained prevent potential accidents involving unaware bystanders.		
			- Develop and enforce a clear communication, and between the loader operator and ground crew to ensure smooth coordination of successful empletion of the loading process.		
			- Conduct regular have a ssess ants and maintena to checks on the tailgate loader equipment oprom, in identical address any mechanical issues or defects that could composite safe		
			- Encourage a sum-basic approach to using large or heavy items that may be difficent individual the difference individual to diffice the difference of the d		
			- Utilise new mical and such as dollies, trolleys, or forklifts, to assist in safe handling and apportunit of heavy or unwieldy cargo when necessary.		
	1		to reactive easures to mitigate risks.		
			- gularly review and update the Safe Work Method Statement (SWMS) for tailgate loaner operations to ensure it reflects current best practices and effectively addresses the evolving hazards associated with this type of work.

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

#### SAF WC A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to review the sure it remains revised if necessary) if relevant control measure are a conconsultation with workers (including contractors are subcontract of the SWMS and their health and safety representatives who re workplace.

ke sure it remains effective and must be reviewed (and are subcontractions) who may be affected by the operation sentatives who received that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

#### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWN			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting sections.			
Responsible person is assigned and listed on the SWMS for the imement of cont, measures.			
Permit requirements specified, such as Hot Wey, Electrical Work, Verat Heights etc.			
SWMS identifies plant and equipment to be up t.			
Details of inspection checks required for any equipment listed approved on the SWMS.			
Describes any mandatory qualifications, experience vaining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
