requirements to first identify any site hazards, conduction inical those	NAME	SIGNATURE	DATE					
If an incident or a near miss occurs, all work must study unately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.								
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.								
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Inadequate training, Slip or trip hazards	2М	 Ensure all workers operating or working near the vehicle hoist have completed appropriate training and are deemed competent to scally perform tasks in the workplace. Conduct regular safety briefings or toolboor acks to remind workers of essential safety procedures and discuss potential hazeds presentatile working with a vehicle hoist. Install adequate lighting in the work area to ensure visibility of any potential slip or trip hazards, such as oil spills upols, or cables. Implement good here neeping dactices, ensuring work area is clean, tidy, and free from obstructors where could cause slips, trins, or falls. Require workers to wear a propriate erst approtective equipment (PPE), such as non-slipt shoes a reduce of risk of slipting on wet or oily surfaces. Conclusioner-station scks on the vehicle hoist to make sure it is in proper working order a done s not assent hazards during operation. Ensure that orders are aware of their surroundings and keep an eye out for any notential azard, including monitoring other people and machines in the area. Lengiblist clear cummunication protocols between coworkers, enabling them to report or ds promptly and receive assistance when needed. Se caution signs or barriers to demarcate areas where the risk of slips and trips is he intened, such as spill-prone zones or high-traffic walkways. Schedule regular inspections and maintenance activities for the vehicle hoist, addressing any identified issues immediately to mitigate risks and maintain a safe working environment. 	1L	
2. Pre-Operation Inspection	Electric shock, Faulty equipment	ЗН	 Ensure a qualified electrician inspects and certifies all electrical components of the vehicle hoist before use, including power outlets, cables, and control panels. Develop and implement a thorough daily pre-operation checklist for the vehicle hoist, focusing on identifying any signs of wear or damage to critical parts, such as lifting arms, hydraulic hoses, and safety locks. Train all operators in the correct use, inspection, and hazard identification procedures for the vehicle hoist equipment. Establish regular maintenance schedules for the vehicle hoist to keep all components in optimal working condition and avoid unexpected breakdowns. Install proper grounding and GFCI protection on all power sources connected to the vehicle hoist to minimise the risk of electric shock. Utilise lockout/tagout procedures when performing any maintenance or repairs on the vehicle hoist to prevent accidental energising of equipment during servicing. 	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Inspect all lifting gear and attachments, such as hooks, chains, and slings, to ensure they are in good working order and capable of supporting the load safely.		
			- Provide non-conductive or insulated tools to work prengaged in the operation and maintenance of the vehicle hoist.		
			- Keep the work area around the vehicle hundry and free rom spills or standing water to reduce the potential for electric should be a standard or standard be a standard be standard be standard be a standard be a		
			- Make sure that only authorised and properly the ed personnel are permitted to operate and maintain the vehicle hoist.		
			- Keep an adequate supply of reacement parts on-		
			- Regularly interest and very that an enfety denses, such as emergency stop buttons and in switches e function or enectly.		
			- Proceeding a contraction between workers, supervisors, and other stake, to a regaring potential safety concerns related to the vehicle hoist equipment.		
			- Establish a sectem for exporting and documenting near misses, incidents, and sident relate to the hazards of the vehicle hoist in order to improve upon existing satisfies sures continuously.		
			pplement a traffic management plan to control and manage the flow of vehicles which designated work areas, ensuring clear signage and access paths for all workers and vehicles.		
	G		 Provide training and instruction to staff members on proper vehicle positioning procedures when using a hoist, including loading guidelines and limitations specific to the equipment. 		
			 Employ visual aids such as line markings, cones, or barriers to outline the safe working area for vehicle placement under the hoist, allowing for sufficient space around the vehicle and equipment. 		
3. Vehicle Positioning	Collision with objects, Incorrect vehicle placement	2M	 Install and maintain effective communication systems (e.g., radios, hand signals, visible indicators) for coordinating vehicle movement, ensuring clear, concise information is exchanged between drivers and operators. 	1L	
			 Conduct regular inspections and maintenance on vehicle hoist equipment to guarantee its reliability and safety, addressing any identified defects or damage in a timely manner. 		
			- Utilise lifting points specifically designed for the vehicle being raised on the hoist, adhering to manufacturer guidance, and double-checking connections before initiating the lift.		
			- Provide suitable personal protective equipment (PPE) for staff involved in vehicle placement duties, such as high-visibility vests and steel-toed footwear, reducing the risk of injury from collisions or falling objects.

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAF WC A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to review the sure it remains revised if necessary) if relevant control measure are a conconsultation with workers (including contractors are subcontract of the SWMS and their health and safety representatives who re workplace.

ke sure it remains effective and must be reviewed (and acception of the process should be carried out in s any subcontract s) who may be affected by the operation esentatives who recented that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWN			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting sections.			
Responsible person is assigned and listed on the SWMS for the impement of continue measures.			
Permit requirements specified, such as Hot Wren Electrical Work, Versat Heights etc.			
SWMS identifies plant and equipment to be up.			
Details of inspection checks required for any equipment listed ar noted on the SWMS.			
Describes any mandatory qualifications, experience vaining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
